

Digital to Analog Converter

Description

Compact device accepts either TOSLINK or coaxial digital audio input, and converts it to left/right analog line level output. It's perfect when connecting televisions, DVD and Blu-ray players to audio equipment that lacks the necessary digital input.

Features

- Supports 32KHz, 44.1 KHz, 48 KHz, and 96KHz sampling rates
- Automatically down-mixes up to six channels (5.1) to an analog stereo signal
- Switch-selectable between S/PDIF to TOSLINK input
- Unbalanced line-level output through RCA connectors
- 5V DC adapter included
