PRODUCT DISCONTINUATION NOTICE

TYPE OF CHANGE: ☐ Design ☐ Manufacturing ☒ Other: Obsolescence

Product discontinuation signifies the final stage of the product life cycle. It is Power Integrations' policy to provide sufficient notice to customers to allow re-design with replacement parts and/or place final orders. All such orders will be non-cancellable and non-returnable. Please contact your local Power Integrations sales office to arrange final orders for the affected product(s).

DESCRIPTION:

Discontinue PG part numbers shown in the table. Historically, PG designated parts were "lead-free and halogen-free" while PN part numbers were "lead-free" only. For many years, Power Integrations have been using the same bills of material that are both "lead-free and halogen-free" for both postfixes. The devices, regardless of the marking, are identical and completely interchangeable, differing only in the laser mark. This discontinuation notice is issued for the less popular marking products to assist supply chain management.

REASON FOR DISCONTINUANCE:

Consolidation of the low volume PG ordering part numbers to PN ordering part numbers.

ALTERNATE PARTS:

The replacement products are guaranteed to meet the same datasheet limits and the replacement parts are pin compatible.
