# CR-10S Pro PEI Printing Plate 320*310*2mm Frosted Surface

MFR: 4004090036

Product Information

Gold PEI with Frosted Surface
Flame Retardant and Heat Resistant

Two in one kit

Strong adhesion, easy to use and replace

1.Gold frosted
PEI printing plate

2.Soft magnet
platform sticker

PEI printing plate

Flame retardant and heat resistant / High strength and wear resistant

Gold PEI with frosted surface

Flame retardant and heat resistant

Gold PEI with frosted surface is of strong high temperature
stability, flame retardant, heat resistance,
high strength, wear resistance and good printing stability

* PEI (Polyetherimide): The oxygen index is 46%, and the combustion
grade is UL94-V-0. PEI material has strong high temperature stability,
high rigidity and low smoke

PEI spring plate
No deformation at 200℃

Genuine PEI powder coating is of heat resistance. Hardened
steel spring plate is resistant to 200℃ and no deformation

200℃

CREALITY

Soft magnetic sticker

Strong magnetic force / Strong adhesion

Strong magnetic force
Easy removal
Strong adhesion when printing

Composite magnetic material without demagnetization is easy to hang and pick up

# Flame retardant and heat resistant

## Heat resistant and no demagnetization

PC belongs to the soft magnet , with flame–retardant, wear–resistant, oxidation–resistant, low forming shrinkage and heat resistance without demagnetization.There is the good combination between hot–melt material and printing layer, which reduces the deformation caused by shrinkage and avoids warping
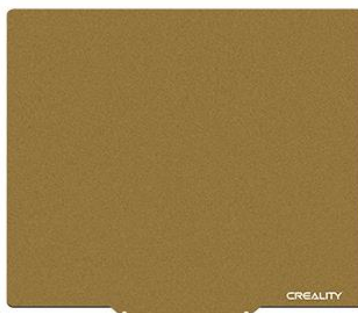

Product display

Product information

235*235*2mm

Product name： PEI printing plate kit
Product color: gold
Applicable models:
Ender-5 series, Ender-3 series,
CR-20 series, CP-01

310*320*2mm

Product name： PEI printing plate kit
Product color: gold
Applicable models: CR-10 series

255*245*2mm

Product name： PEI printing plate kit
Product color: gold
Applicable models: CR-6SE

377*370*2mm

Product name： PEI printing plate kit
Product color: gold
Applicable models: Ender-5 Plus
