

17-Dec-2021

PCN #: P-21-021923

Subject : Mini K HV Product Family - V23700-xxxxxx-xxxx - All

Description of Change : Dear Customer,

We hereby inform you that our current copper material supplier has currently no capacity to supply us and present a backlog of near 6 months.

In order to fulfil our commitments with our customers we have approved the usage of a second source for relay spring from an alternative supplier. This alternative supplier is already approved for automotive industry and supplies our plant with material for similar relays.

The material from the alternative suppliers complies with general specifications (UNS C17200, ISO CuBe2, or JIS 1720) and also our internal material specification TEC-100-238. This change is nor a Form Fit Function and all product requirements are fulfilled.

This is only a Informative PCN with no need to be released from customer side. We appeal for your understanding, but right now it is the only possible alternative to avoid stoppages in our production line and at our customers.

Reason : Product improvement.This situation is related to failures in the copper raw material supply chain that are severely and transversally affecting the entire automotive industry.

The supplier is unable to meet the deadlines and quantities previously agreed with TE.
