RELEASED

Before Change

Overview

- Due to manufacturing constraints at the Florence Kentucky location of one of our resin suppliers, it has been determined to move the manufacturing of one of the resin product families to the Evansville Indiana location of that same supplier.
- To keep from line down situations not only for Molex but also our customers, the ability to purchase resin from this additional location of our current resin supplier is needed.
- Risk of receiving resin from this alternate location is Very Low as the supplier itself isn't changing
 - Product would be made from same the manufacturer, with the same raw components
 - Resin recipe itself also will not change

After Change

(Overview continued)

- Under normal conditions, we would complete all necessary steps including notifications and testing per USCAR and GMW. We are now needing to make real time decisions on alternate material supply options. Without these decisions, we could, in some cases, risk running out of needed material.
- Part Number Impact
 - See Attached List
- Product Impact
 - NO Impact to Fit, Form or Function
- Qualifications will be completed prior to product being shipped.
 - These qualification may not be done on all parts but on product families
- PCN is being used as notification of this change and not to ask for approval as our supplier has provided no choice but to make this change.
- Questions/concerns contact your Molex Account manager
