

POWERED BY CARLSBRO

**CSD120/CSD130**  
**DIGITAL DRUM USER GUIDE**

# **Congratulations!**

Thank you for purchasing this digital drum set. The drum set has been Developed to act and play like a drum set but with greater ease. Before you use the instrument, we recommend you to read through this manual.

## **Taking care of Your Digital Drum Set**

### **Location**

- Do not expose the unit to the following Conditions to avoid deformation, discoloration or more serious damage.
- Direct sunlight.
- High temperature (near a heat)source, Or in car during the day time).
- Disconnect all cables before moving

### **Power Supply**

- make sure to use the suitable AC adaptor, and also make sure the ac outlet voltage at your country matches the input voltage specified on the AC AC adaptor's label.
- Turn the power switch OFF When the Instrument is not in use.
- An AC adaptor should be unplugged from the AC outlet if the instrument is not be used for an extended period of time.
- Unplug the AC adaptor during electric storms.
- Avoid plugging the AC adaptor into
- The same AC outlet as appliance with high power consumption, such as electric heaters or ovens. Also avoid using multi-plug adaptors since these can result in reducing the sound quality, operation errors, and possibly damage.

### **Turn Power OFF When Making Connections**

- To avoid damage to the instrument and other devices to which it is Connected, turn the power switches of all related device OFF prior to connecting or disconnecting cables.

### **Handling and Transport**

- Never apply excessive force to the controls, connectors or other parts of the instrument.
- Always unplug cables by gripping the plug firmly, but not pulling on the cable.
- Disconnect all cables before moving The instrument.
- Physical shocks caused by dropping, bumping, or placing heavy objects on the instrument can result in scratches more serious damage.

### **Cleaning**

- Clean the unit with a dry soft cloth.
- A Slightly damp cloth may be used to Remove stubborn grime and dirt.
- Never use cleaners such as alcohol or thinner.
- Avoid placing vinyl object on top of The unit (uivnyl can stick to and discolor the surface).

### **Electrical Interference**

- This instrument contains digital circuitry and may cause interference if placed too close to radio or television receivers. If this occurs, move the instrument further away from the affected equipment.

## 1. Assembly

Caution

- While adjusting the collar, please take extra care to avoid injury.
- Set the each part to the correct position.

### Assembly steps:

#### Drum stand assembly

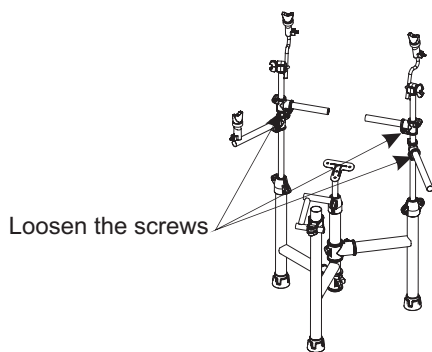

- 1). Take out the drum stand and loosen the screws of the collars.
- 2). Set the three master tube at 120° angle.
- 3). Screw down at the collars.

- 4). Loosen the screws at the collars.
- 5). Set the L/R cymbal tubes to the proper height.
- 6). Screw down to fix the cymbal tubes.

- 7). Loosen the screws at the collars.
- 8). Adjust the cymbal collars to proper height.
- 9). Screw down to fix the cymbal tubes.

- 10). Loosen the screws at the collars.
- 11). Adjust the HI-HAT collars to proper height.
- 12). Screw down to fix the HI-HAT tubes.

- 13). Loosen the butterfly nuts.
- 14). Adjust the cymbal rod to proper height and angle.
- 15). Tighten the butterfly nuts.

- 16). Loosen the screws at the collars.
- 17). Adjust the U stand of snare to proper position.
- 18). Screw down.

- 19). Loosen the screws at the collars.
- 20). Set the module stand to proper position.
- 21). Screw down.

- 22). Adjust the balance of the drum stand.
- 23). Tighten all the screws at the collars. Tighten the clip screw.

### Assemble the pads

- 1). Take out the pads (3 TOM and 1 Snare) . Loosen the square screw.
- 2). Assemble the pads onto the tubes and adjust the position.
- 3). Tighten the square screw.

TOM

SNARE

### Assemble the cymbals

- 1) Loosen the butterfly nut on the left side of the HI-HAT.
- 2) Assemble the HI-HAT cymbal.
- 3) Tighten the butterfly nut (Note: don't overtighten)

- 4). Loosen the butterfly nut on the cymbal rod.
- 5). Assemble the CRASH/RIDE cymbal onto the rod.
- 6). Tighten the butterfly nut (Note: don't overtighten)

Loosen the butterfly nut

## Assemble the module

- 1). Loosen the square screws of the module.
- 2). Assemble the module onto the module stand.
- 3). Screw down.

Loosen the square screws

## Assemble the bass drum (only CSD130)

- 1). take out the bass drum and bass drum stand
- 2). loosen the square screw of the bass drum
- 3). assemble the bass drum on the stand
- 4). Tighten the square screw.

- 5). Fix the support bar to the pedal.
- 6). Fix the bass drum stand the hammer, and tighten the screw

- 7). Loosen the square screw of the hammer
- 8). tighter the square screw to fix the hammer

### Assemble the pedal and the bass drum

- 1) Put the pedal to the left floor.
- 2) Put the bass drum (with hammer) to the right floor.

Note CSD120 pedal is used as bass drum. Each of the pedal can be used as bass drum.

### Connect the pads

- 1). Use the cable to connect the D-SUB connector of the module and the pad.
- 2). Use the cable tie to tie the cable ( 12 ties )

## 2. Fold the drum stand

### Arrange the pad cables

- 1). Turn off the power supply.
- 2). Disconnect all the cables with the module.
- 3). Disconnect all the cables with the pads.
- 4). Take out the cable ties.
- 5). Rearrange the cables and bind them onto the tubes.
- 6). Disassemble the module and assemble the screws into the module and put the module into the bag.
- 7). Put the pedal into the bag.

Note:

The model CSD130 needs to be disassembled the hammer and the bass drum stand and put them into the bag.

### Fold the CRASH

- 1). Loosen the butterfly nuts and knob.
- 2). Loosen the square screws.
- 3). Fold the CRASH as the figure below.
- 4). Tighten the square screw and properly tighten the butterfly nuts.

### Fold the Hi-Hat-CYMBAL and TOM1

- 1). Loosen the square screws.
- 2). Take out as direction 1, rotate 90 degree as direction 2, and put in as direction 3.
- 3). Screw down (as the right figure).

- 4). Loosen the square screw on the back of TOM1.
- 5). Put the pad vertically and adjust the position according to the dimension in the figure.

- 6). Loosen the square screw. Adjust Hi-Hat-CYMBAL & TOM1.
- 7). Put the collar up as the figure below.
- 8). Tighten the square screw.

## Fold the RIDE

- 1) Loosen the butterfly knob and nut.
- 2) Loosen the square screw.
  - a. Fold the RIDE cymbal as the figure below.
  - b. Tighten the square screw. Tighten the butterfly nut & knob properly.

## Fold TOM2 and TOM3

- 1). Loosen the screws on the back of TOM2 and TOM3.
- 2). Put the pad vertically and adjust the pad position according to the dimension in the figure.
- 3). Loosen the square screw on the collar and adjust TOM2 & TOM3.
- 4). Put the collar closely as the figure.
- 5). Tighten the square screw.

## Fold SNARE

- 1). Loosen the square screw on the clip.
- 2). Loosen the square screw on the back of SNARE.
- 3). Adjust SNARE to proper position as the figure below.
- 4). Tighten the square screw.

### Fold the whole set

- 1). Loosen the square screw.
- 2). Rotate as the figure below and keep it stable while folding.

- 3). Rotate as the figure below and put the left and right part close.

- 4). Rotate the supporting tube as the figure below.

5). Fold the supporting part and keep the collar up closely.

6). Rotate as the figure below and fold the whole set.

Note:

User can put the whole drum set into bag (Optional bag).

## 2. Module function

### Front panel

|--|--|

- ①⑥ USB interface  
Connects with PC to deliver MIDI signal.
- ①⑦ MIDI in/out port  
Connects with external MIDI devices (The drum MIDI signal outputs via MIDI OUT to external audio source. The external MIDI signal inputs to the drum via MIDI IN.)
- ①⑧ Trigger in connector  
Pad signal input connector.
- ①⑨ AUX IN  
External stereo input connector, e.g. MP3 or CD player.
- ①⑩ -OUTPUT- L/mono R  
The stereo output connector to connect with audio system or drum amp, L/R stereo output and L/mono output
- ①⑪ PHONE  
Stereo phone output connector.
- ①⑫ DC-In  
Power adaptor connector, 9V DC

## LED Display

Drum kit LED lights up: the number means the drum kit number

Tone LED lights up: the number means the voice number.

the preset song LED lights up: the number means the preset song number.

## 4. Connect with external devices

### Connecting with audio system or drum speaker cabinet

Connect one end with L/mono R, and the other end with audio system or drum amplifier, such as EDA series.

Note:

- 1). L/mono is only for the left channel output.
- 2). When connecting with stereo devices, it needs to connect L/mono and R connectors.  
The volume is controlled by the module volume knob and device volume knob.

### Connect with Headphones

Connect the phone with 1/4" stereo connector on the module (if 1/8" phone is used, use an adaptor). The volume is controlled by the volume knob on the module.

### Connect with MP3 or CD player

Connect the output of MP3 or CD player with AUX IN connector of the module. The input signal can be mixed with the drum signal. User can strike the pad according to the metronome click of input signal.

## Connect with PC

- 1). Connect PC via USB  
Receives and delivers MIDI signal.

- 2). Connect PC via MIDI port  
MIDI IN: receives external MIDI signal.  
MIDI OUT: delivers pad signal to external MIDI device or PC.

## Connect with MIDI keyboard

MIDI port: connect with the MIDI OUT connector of MIDI keyboard or external pads as the external audio source to control this digital drum.

## Power supply

- 1). Turn off the module power switch.
- 2). Connect the power supply with DC IN connector.
- 3). Confirm all the pads are correctly connected. Set the module volume to minimum, then turn on the power switch of the module. The display lights up and it enters into the drum kit menu.

turn off the power switch before connecting with other devices.

## 5. Operation

### Power switch

- 1). Confirm all the cables are connected well, then set the module volume to minimum, then turn on the power switch.

- MASTER VOLUME+

- 2). When the display lights up, enter into the module menu operation (enter into the drum kit menu when on).

### Adjust the master volume

Strike the pads and adjust the volume knob for proper master volume.

## Select drum kit and reverb

- 1). Press [KIT REV ON/OFF] key to enter into drum kit setting or to switch drum kit and reverb effect.

- 2). Press [KIT REV ON/OFF] key to enter into drum selection. The display shows drum kit number and the KIT LED lights up. Use [-DATA+] button to select drum kit.

Preset drum kit: KIT01---20

User drum kit: USER01---10

- 3). Press [KIT REV ON/OFF] button to enter into reverb setting. LED shows the reverb effect. Use [-DATA+] button to switch the reverb effect (use the reverb effect to make the sound fuller)

## Pad parameter setting

Press [VOICE VOL/PAN/TUN] key to enter into the pad parameter setting and then enter into voice, level, pan, tuning.

Voice: the module has 250 voices. Please refer to the voice list.

## Select pad voice

- 1) Press [VOICE VOL/PAN/TUN] button for the first time to enter into voice setting. The display shows the current pad voice and the voice LED lights up.

- 2). Strike the pad of which voice to be changed. Use [-DATA+] button to select the voice (voice Number:001-250\* non-recycle)

### Adjust pad volume

- 1). When adjusting the pad volume, press once again [VOICE VOL/PAN/TUN] button to enter Into pad volume setting. The first LED shows 『L』, and the other two LED shows the volume Value. VOICE LED lights up.
- 2). Strike the pad of which volume to be changed. Use [-DATA+] button to select the volume (00-32\* non-recycle) .

### Pad pan

- 1). Press [VOICE VOL/PAN/TUN] button continuously to enter into the pan setting. The display displays letter “P” first and then the pan value. The VOICE LED lights up.
- 2). Strike the pad of which the pan to be adjusted. Use [-DATA+] button to adjust the pad pan ( $\pm 8$ , non-recycle)

### Pad tuning

This function is used for tuning the pad

- 1). Press [VOICE VOL/PAN/TUN] button continuously to enter into pad tuning. The display displays letter “t” , and then the tuning value. VOICE LED lights up.
- 2). Strike the pad to be tuned. Use [-DATA+] button to adjust pad tuning ( $\pm 2$  , non-recycle) .

### Establish user drum kit

In the drum kit menu, user can select the preset drum kit to play, or user can select the pad voice and relative parameters, e.g. voice, volume, L/R pan, tuning.

This module has 30 drum kits: Preset drum kits: KIT01---20

User drum kits: USER01---10

- 1). In the drum kit menu, press [SAVE] button to enter into user drum kit setting. Use [-DATA+] button to select the user drum kit (U01-U10\* non-cycle) . During this process, the drum kit number flashes.
- 2). Press the pad parameter setting to change the pad tone/volume/pan/tune.
- 3). Press [SAVE] button once again to save the drum kit setting, and the former drum kits will be covered by the new drum kit. The drum kit number stops flashing.

SAVE

Note: if the drum kit number has been changed or the power fails before saving, the former drum kit parameters will be lost.

## Song setting

### Select song

- 1). Press [SONG] button to enter into song setting. The display shows the song number. SONG LED flashes once and then lights off.
- 2). Use [-DATA+] button to select the current song number (1-20, non-recycle) .

SONG

## Song playing

- 1). Press [START/STOP] button to play the selected song. During playing, change the song via [-DATA+] button.
- 2). After playing it stops automatically; during playing, press [START/STOP] button two times to stop playing. (Note: during playing, press [START/STOP] button one time to switch to play the recorded songs.)

START/STOP

Note: during playing\* user can send real time MIDI signal via MIDI OUT.

## Accompaniment volume

During playing, user can adjust the volume of accompaniment and of the drum sound.

- 1). Press [ACCOMP VOLUME] button to enter into accompaniment volume setting. The display shows letter "A" first, and the accompaniment volume value next. SONG LED lights up.
- 2). Use [-DATA+] button to adjust the accompaniment volume (0-32, non-recycle) .

VOLUME

### Drum sound volume of the song

- 1). Press [ACCOMP VOLUME] button continuously to enter into the drum sound setting. The display shows letter “d” first, and the drum sound volume next. SONG LED lights up.
- 2). Use [-DATA+] button to adjust the drum sound volume of the song (0-32, non-recycle) .

VOLUME

### Song tempo

During playing DEMO SONG, use [-TEMPO+] button to adjust the song tempo.

### Drum sound of the song (percussion)

Press [DRUM OFF] button to start/close the drum sound function. If “DRUM OFF” starts, the drum sound will be closed and “DRUM OFF” LED lights on.

DRUM OFF

### Tempo setting and the metronome click

#### Tempo

- 1). Press [-TEMPO+] button to enter into the tempo setting to change the metronome click and song tempo (35-280, non-recycle) .
- 2). If the tempo has not been changed in 2 seconds, the module will return back to the former menu automatically.

TEMPO

#### Metronome

- 1). Press [CLICK] button to start/close the metronome voice. This module has two metronome voices: triangle and click. When the metronome starts, it offers the triangle voice. Press [CLICK] button twice it switches to click voice.
- 2). When the metronome counts the beats, the beats (2/4, 3/4, 4/4, 5/4, 6/8) is shown on The display. Use [-DATA+] button to change the beats (recycle).

3)Use the master volume knob to change the metronome volume.

CLICK

song voice kit

Note: during playing the songs, the metronome is closed.  
Press [CLICK] button to start metronome function.

## 6. Record and replay

### Record quickly

- 1). Press [RECORD] button, and [RECORD] LED lights up and flashes. It shows “REC” .
- 2). Strike the pads to start recording or record only the drum sound of the song being played.
- 3). Press [RECORD] button to stop recording. [RECORD] LED lights off. The song or the user's performance has been recorded.

RECORD

song voice kit

Note:

- 1). During recording, the metronome function will not automatically start. If user needs to start the metronome function, user can press [CLICK] button before recording instead of pressing it after recording.
  - 2). The metronome sound can not be recorded.
  - 3). If user is not satisfied with the recorded result, press [RECORD] to restart recording.
- (Note: this module supports the recording function, but not saving function. The recorded data will cover the former data, and all the data will not be saved after the module is powered off).

### Play the recorded song

- 1). Press [START/STOP] button twice to replay the recorded song, and meanwhile [START/STOP] button and [RECORD] LED lights up.
- 2). After replaying, [UTILITY] button and [RECORD] LED lights off.

## 7. Practical setting

Press [UTILITY] button to enter into practical setting, then into the following menu gradually.

### Trigger sensitivity

- 1). Press [UTILITY] button to enter into the trigger sensitivity setting. The display shows letter 『E』 first, and the sensitivity level next.
- 2). Strike the pads to select proper sensitivity.

- 3). Use [-DATA+] button to adjust the trigger sensitivity (01-08,non-recycle) . The higher the value means higher sensitivity.

### Crosstalk rejection

Strike a pad (trigger) and the vibration may cause crosstalk.

- 1). Press [SET UP] button continuously to enter into trigger sensitivity setting. The display shows letter 『O』 first and the crosstalk rejection level next.
- 2). Use [-DATA+] button to adjust the trigger sensitivity rejection level (01-16,non-recycle) . The higher value means higher rejection level.

### Trigger curve

- 1). Press [SET UP] button continuously to enter into trigger curve setting. The display shows letter “CU” first and the trigger curve number next.
- 2). Use [-DATA+] button to select the trigger curve (1-6,non-recycle) . This will change the relation between force and the loudness.
- 3). CURVE 1: Small dynamic response. Select this curve and it delivers high but stable volume.  
CURVE2: The standard setting to deliver natural signal.  
CURVE3: Compared to CURVE2, low striking force causes big volume change.  
CURVE4: Compared to CURVE2, comparatively high striking force causes comparatively big volume change.  
CURVE5: Compared to CURVE2, comparatively high striking force causes very big volume change.  
CURVE6: The striking force causes extreme volume change.

CURVE4

CURVE5

CURVE6

### Save the set-up

Press [SAVE] button to save the 3 setting mentioned above: sensitivity/crosstalk rejection/striking force.

save

### Local control

- 1). Press [SET UP] button to enter into the local setting. It shows the local control status: “Lon” for ON or “Lof” for OFF. Use [-DATA+] button to switch. Refer to the following figure for the local control setting:

Local control: used to control the connection of trigger detection and the audio source sequencer. In the default ON status, the two modules are connected. Striking the pad will generate sound and it outputs the relative MIDI signal. When this function is turned off, the audio source module will not be controlled by the trigger directly, but will controlled by the MIDI input signal.

## 8. Reset setting

Hold [TEMPO+] and [SET UP] button at the same time. It reset back to the factory setting:  
All user drum kits: voice/volume/pan/tuning  
Practical setting: sensitivity/crosstalk rejection/striking force curve

## 9. MIDI setting

This equipment is compatible with various MIDI devices and can be used as trigger device or audio source. It is also compatible with part of GM standard, and can be used with many audio sequencer softwares together.

### MIDI connection

MIDI IN: receives the external MIDI signal when connecting with external MIDI devices.

MIDI OUT: sends the external MIDI signal when connecting with external MIDI devices.

USB: the standard USB2.0 interface can be connected with standard USB MIDI device or PC.

The operation system has its driver without the need of repeated installation. It is compatible with computer system, e.g. XP, Win7, Vista, Mac OS X. After connection, the system recognizes this equipment as USB COMPOSITE DEVICE.

(USB is only used when connected with MIDI devices)

Note: when USB is connected with PC, all MIDI data can be sent or received via USB.

### Connect with external audio source equipment

This equipment can send its various information via channel 10, including: trigger notes, force, hi-hat pedal performance and status, etc.

(Note: the song replaying and metronome information can not be sent)

Use the external audio sequencer to record the performance

- 1). Connect external audio sequencer or PC via MIDI OUT or USB.
- 2). Set the equipment of channel 10 in the audio sequencer or in the sequence software, and then start recording.
- 3). Play the pads.
- 4). Stop the performance and recording, and listen to the performance.

### Used as audio source equipment

When connecting with external MIDI keyboard or audio sequencer via MIDI OUT or USB cable, it receives its MIDI output signal. At this time this equipment can play the effective signals. The output voice changes as the drum kit is switched. This equipment has most of the GM voices. User can establish user drum kits. Refer to MIDI List for MIDI information.
