TE Connectivity

Product Change Notification: P-22-022076

PCN Date: 25-JAN-22

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:

POS, MCON 1.2 CB REC 1p TL SEALED

Description of Changes

TE is changing the peripheral seal material used in the 4P, 5P and 6P MCON CB connector families. Part numbers are listed in the information tab. The new seal material is considered next generation with enhanced hot tear strength. TE will switch over to the new seal material based on material availability at the TE assembly locations. This PCN does not require any TE part number changes. TE drawings will be updated to call out the new seal material and a major revision change will be made at a seal component level only, not at the final assembly level. TE will track the seal material change via the date code printed on the physical assemblies.

Reason for Changes:

Product improvement. Peripheral Seal material change due to increased global demand and severe supply constraints/obsolescence of components in the current formulation.

Estimated Dates:

Last Order Date (Obsolete Parts Only):

First Date To Ship (Changed Parts Only):

01-FEB-2022

Last Ship Date (Obsolete Parts Only):

Last Date for Mixed Shipments: (Changed Parts Only):

No Mixed Shipments
