

# PAT CHECKBOX

## PAT CALIBRATION CHECKER

As recognised by the IET code of practice for PAT testing, regularly checking your instrument's accuracy is an essential part of PAT testing. The Seaward PAT Checkbox has been designed to provide a safe, simple and quick means of checking the calibration of Portable Appliance Testers, to ensure accurate testing. The Checkbox will also check other brands of Portable Appliance Testers.

### Technical Specification

|                       |                    |
|-----------------------|--------------------|
| Earth Bond Reading    | +/- 1% +/- 1 digit |
| Flash Test Reading    | +/- 1% +/- 1 digit |
| Insulation Reading    | +/- 1% +/- 1 digit |
| Earth Leakage Reading | +/- 1% +/- 1 digit |
