## To whom it may concern

Schwäbisch Hall, 16<sup>th</sup> July 2019

## Product Change Notification PCN 2019003

Dear esteemed customers,

this letter is to inform you about a product change of our Pressure Compensation DA 084.

**From now on** the STEGO-Logo is injected on the cap. For details please see the pictures below:

The Logo is already injected during the manufacturing process and therefore produced from the same material.

This product change affects all pressure compensation devices of the series DA 084 and so the article numbers 08400.0-02, 08400.0-03, 08400.0-07 and 08400.9-01.

Because of our current stock level it is possible that you receive pressure compensation devices without injected logo for a short period.

Please forward this letter to the responsible departments within your company. If you have any further queries, please do not hesitate to contact us by phone +49 (0)791 950 58-151 or email at [service@stego.de](mailto:service@stego.de).

For any further questions feel free to contact us.

On behalf of STEGO Elektrotechnik GmbH

Best regards,

A handwritten signature in blue ink, appearing to read 'J. Mosebach', is positioned above the printed name.

Jan-Thomas Mosebach  
Sales Engineer
