

Development Board Discontinuance

Lattice is providing this notification of our intent to discontinue the iCE40 UltraPlus Mobile Development Platform with Ordering Part Number (OPN) **ICE40UP5K-MDP-EVN**. The components needed to manufacture this board are already obsolete and do not have alternative parts.

Lattice recommends the Himax HM01B0 UPduino Shield with OPN **HM01B0-UPD-EVN**. This board has camera and microphones on board. It can be used to interface to Arduino compatible sensors. Other alternative is the iCE40 UltraPlus Breakout Board with OPN **ICE40UP5K-B-EVN** which PMOD connectors can be plugged in to get some of the same kinds of interfaces with ICE40UP5K-MDP-EVN.

If you have any questions or require additional information, please contact your respective Lattice customer service or sales representative.
