

Description - 3M™ Scotch-Weld™ Preformed Sealant Strip 5313

MPN – 7000033722

Details

- Excellent water and weather resistance
- Pliable synthetic sealant for easy sealing and gap filling
- Non-curing, ready once applied
- Available in a variety of pre-cut lengths and profiles
- Based on synthetic rubber

3M™ Scotch-Weld™ Preformed Sealant Strip 5313 is a tacky solid extrusion based on a synthetic rubber. The adhesive strength of 5313 is sufficient to cause cohesive failure of the sealer before loss of adhesion to the substrate, when pulled in tension.

Retain the same properties and consistency after aging in several different environments including weathering, when using 3M™ Scotch-Weld™ Preformed Sealant Strip 5313. Our black sealant strip is a tacky solid extrusion based on a synthetic rubber. It also doesn't blister, lose adhesion or is affected by heat or plasticiser migration.

Suggested Applications

- Use as a non-curing strip that retains the same features and consistency after aging in several different environments
