**Sites Affected:**

onsemi Sites	External Foundry/Subcon Sites
None	HANA Semiconductor, Thailand

**Description and Purpose:**

onsemi would like to notify its customers of the qualification of alternate mold compound, G770HCD, at its subcon, HANA Thailand, for its QFN and DFN package. This qualification is required due to notification from our current supplier, Showa Denko, of an impending supply shortage for mold compound type CEL9220HF13. This will allow package flexibility with regards to assembly production support depending on the mold compound availability and help to prevent any kind of supply disruption. Our notification from Showa Denko had a short window and we ask that customers immediately qualify the change.
