

## Product Change Notice: AQY28 Series and AQW28 Series PhotoMOS® Relays

04.19.2022

PCN.PG01.04.19.2022

### About This Notice:

Please be advised that there will be a change in the tube packing style for the AQY28 and AQW28 Series PhotoMOS® Relays.

### Effective Date:

From July 2021 production onwards.

### Change Details:

Stopper on the fixed side has changed from tape type to integrated tube type. The addition of a marking is used to indicate the fixed side stopper direction (blue or orange color: depending on type). This alteration will change the stopper shape, tube length and package length to increase stopper strength.

	Before change	After change
Fixed side stopper Change of method  Addition of indication mark	<p>*Tape type stopper</p>	<p>*Indication mark</p> <p>*Tube integrated stopper</p> <p>• Fixed side stopper changed from tape type to integrated tube type. • Addition of marking to indicate direction of fixed side stopper (blue and orange colors are available for different relay types).</p>
