- **8 ports**
- **Ethernet 1000 Mbps**
- **4K Ultra HD**
- **3 x USB-A 3.0**
- **VGA data transmission**

- **USB-C PD charging, 100W**
- **3.5 mm audio jack, support audio output**
- **Aluminum housing**
- **"Plug and Play"**
- **Compatible with Mac OS, Windows OS**

The DS-14 hub turns one USB-C port into eight versatile connectors. You will be able to connect the monitor via HDMI or VGA port. There is a mini-jack for headphones or speakers. Three USB-A 3.0 ports allow you to connect three peripheral accessories at once conveniently. The up to 100W USB-C PD charging port allows you to charge your connected device at optimal speed. You can connect directly to the network via Gigabit Ethernet using the hub. Lightweight and durable aluminum housing helps maintain signal quality. "Plug and Play" - connect the hub and work without installing additional software. The hub will take up minimal space in your bag due to its compact size. The perfect combination of size and functionality!

Designed for Apple
