# NJ101-

P43I-E-01

# Machine Automation Controller NJ series

Sysmac solutions for every machine New controllers ideal for simple machines

### **Features**

- Fully compatible with NJ501/301 Machine Automation Controllers, having the same concept, dimensions, general specifications, and functions. Ideal for machines without or with a low number of axes.
- The user program including the double precision floating point arithmetic instruction that is necessary for the coordinates correction, ST language and Function Blocks is executed fast, as well as the basic instructions and the special instructions.
- Integration of Logic and Motion in one CPU
- Synchronous control of all machine network devices: vision sensors, servo drives and field devices with the machine control network, EtherCAT. Synchronize the PLC Engine and the Motion Engine with the EtherCAT control period. Fast and highly-accurate control is possible.
- Standard programming: Conforms IEC 61131-3 standards and JIS B 3503, variable-based instructions including the PLCopen® Motion function blocks
- Complete and robust machine automation: fast control performance and basic functions and reliability of industrial controllers
  - Fan-free operation in ambient temperature between 0 to 55°C
  - Complete RAS functions: Transmission frame error check, timeout, bus diagnosis, Watchdog (WDT), memory check, and topology check, etc.

Sysmac is a trademark or registered trademark of OMRON Corporation in Japan and other countries for OMRON factory automation products. Windows is registered trademarks of Microsoft Corporation in the USA and other countries.

EtherCAT® is a registered trademark of Beckhoff Automation GmbH for their patented technology.

CompoNet<sup>™</sup>, DeviceNet<sup>™</sup> and EtherNet/IP<sup>™</sup> are trademarks of the ODVA.

Other company names and product names in this document are the trademarks or registered trademarks of their respective companies.

## **Ordering Information**

#### **International Standards**

- The standards are abbreviated as follows: U: UL, U1: UL(Class I Division 2 Products for Hazardous Locations), C: CSA, UC: cULus, UC1: cULus (Class I Division 2 Products for Hazardous Locations), CU: cUL, N: NK, L: Lloyd, CE: EC Directives, C-Tick: C-Tick mark, and KC: KC Registration.
- Contact your OMRON representative for further details and applicable conditions for these standards.

### **NJ101 CPU Units**

		Specificat	Specifications			rent ption (A)		
	I/O capacity / maximum number of configuration Units (Expansion Racks)	Program capacity	Memory capacity for variables	Number of motion axes	5 VDC	24 VDC	Model	Standards
NJ101 CPU Units	2,560 points / 40 Units (3	3 MB	0.5 MB: Retained during power interruption	2	1.00		NJ101-1000	UC1, N, L,
Expansion Racks)	Expansion Racks)	SIMID	2 MB: Not retained during power interruption	0	1.90	_	NJ101-9000	UC1, N, L, CE, C-Tick, KC

### Recommended EtherCAT and EtherNet/IP Communications Cables

Use Straight STP (shielded twisted-pair) cable of category 5 or higher with double shielding (braiding and aluminum foil tape) for EtherCAT. Use Straight or cross STP (shielded twisted-pair) cable of category 5 or higher for EtherNet/IP.

### **Cable with Connectors**

It	em	Recommended manufacturer	Cable length (m) *1	Model
	Standard type Category 6a	OMRON	0.3	XS6W-6LSZH8SS30CM-Y

- **\*1.** We recommend you to use above cable for EtherCAT and EtherNet/IP, and RJ45 Connector together. **\*2.** We recommend you to use above cable for EtherCAT and EtherNet/IP, and RJ45 Assembly Connector together.
- **\*3.** We recommend you to use above cable For EtherNet/IP and RJ45 Connectors together.

### **Accessories**

The following accessories come with the CPU Unit.

Item	Specification
Battery	CJ1W-BAT01
End Cover	CJ1W-TER01 (necessary to be connected to the right end of the CPU Rack.)
End Plate	PFP-M (2 pcs)

# **General Specification**

		Nuo					
	Item	NJ101					
Enclosure		Mounted in a panel					
Grounding me	ethod	Ground to less than 100 $\Omega$					
Dimensions (height×depth×width)		90 mm × 90 mm × 90 mm					
Weight		550 g (including the End Cover)					
Current consu	umption	5 VDC, 1.90 A (including SD Memory Card and End Cover)					
	Ambient operating temperature	0 to 55°C					
	Ambient operating humidity	10% to 90% (with no condensation)					
	Atmosphere	Must be free from corrosive gases.					
	Ambient storage temperature	-20 to 75°C (excluding battery)					
Operation	Altitude	2,000 m or less					
environment	Pollution degree	2 or less: Conforms to JIS B3502 and IEC 61131-2.					
	Noise immunity	2 kV on power supply line (Conforms to IEC 61000-4-4.)					
	Overvoltage category	Category II: Conforms to JIS B3502 and IEC 61131-2.					
	EMC immunity level	Zone B					
	Vibration resistance	Conforms to IEC 60068-2-6. 5 to 8.4 Hz with 3.5-mm amplitude, 8.4 to 150 Hz Acceleration of 9.8 m/s $^2$ for 100 min in X, Y, and Z directions (10 sweeps of 10 min each = 100 min total)					
Shock resistance Conforms to IEC 60068-2-27. 147 m/s², 3 times in X, Y, and Z directions (100 m/s² for Relay Output Units)							
Battery	Life	5 years at 25°C					
Бацегу	Model	CJ1W-BAT01					
Applicable sta	andards	Conforms to cULus, NK, LR, EC Directives, C-Tick and KC.					

# **Performance Specifications**

				N.II	101-

	Maximum	Maximum nun per CPU Rack Rack	nber of CJ/NX unit or Expansion	10 Units				
	number of connectable Units	Maximum number of CJ unit on the system		40 Units				
	Omis	Maximum number of NX unit on the system		400 (on NX series EtherCAT slave terminal)				
configuration	Maximum numb	er of expansior	racks	3 max.				
	I/O Capacity	Maximum number of I/O points on CJ-series units		2,560 points max.				
	Power supply unit for CPU rack and expansion racks	Model		NJ-P□3001				
		Power OFF	AC power supply	30 to 45 ms				
		detection time	DC power supply	22 to 25 ms				
		Maximum number of controlled axes *4		6 axes				
	Number of	axes *5	nber of used real	2 axes				
	controlled axes	single-axis co		6 axes				
		Maximum number of axes for linear interpolation axis control		4 axes per axes group				
		Number of axes for circular interpolation axis control		2 axes per axes group				
Motion control	Maximum numb	er of axes grou	ps	32 groups				
Control	Motion control	period		The same control period as that is used for the process data communications cycle for EtherCAT.				
		Number of cam data	Maximum points per cam table	65,535 points				
	Cams	points	Maximum points for all cam tables	262,140 points				
		Maximum nun	ber of cam tables	160 tables				
	Position units			Pulses, millimeters, micrometers, nanometers, degrees or inches				
	Override factors		0.00% or 0.01% to 500.00%					
	Supported services		Sysmac Studio connection					
Peripheral USB port	Physical layer			USB 2.0-compliant B-type connector				
port	Transmission d	istance betweer	Hub and Node	5 m max.				
	Number of port			1				
	Physical layer			10Base-T or 100Base-TX				
Built-in	Frame length			1514 max.				
EtherNet/IP	Media access m	nethod		CSMA/CD	-			
Port	Modulation			Baseband				
	Topology			Star				
	Baud rate			100 Mbps (100Base-TX)				
1 This is the	anacity for the c	execution object	ts and variable ta	ables (including variable names).				

- \*1. This is the capacity for the execution objects and variable tables (including variable names).
  \*2. Words for CJ-series Units in the CIO and Work Areas are not included.
  \*3. Words for CJ-series Units in the Holding, DM, and EM Areas are not included.
  \*4. This is the total for all axis types.

- \*5. This is the total number of axes that are set as servo axes or encoder axes and are also set as used axes.

	Item			NJ101-			
	Ite	em		1000	9000		
	Transmission m	edia		STP (shielded, twisted-pair) cable of Etherne	t category 5, 5e or higher		
	Maximum transi	mission distanc	e between hub	100m			
	Maximum number of cascade connections			There are no restrictions if a switching hub is used.			
		Maximum num connections	ber of	32			
		Packet interva	I *6	1 to 10,000 ms in 1.0-ms increments*8 Can be set for each connection. (Data will be refreshed at the set interval, regardless of the number of nodes.)			
		Permissible co	ommunications	3,000 pps*7 (including heartbeat)			
		Maximum num tag sets	ber of	32			
		Tag types		Network variables, CIO, Work, Holding, DM,	and EM Areas		
	CIP service: Tag Data Links (Cyclic	Number of tag	s per connection	8 (7 tags if Controller status is included in the	tag set.)		
	Communications)	Maximum num	ber of tag	256			
Built-in EtherNet/IP		Maximum link (total size for a	data size per node ill tags)	19,200 bytes			
Port		Maximum data connection	size per	600 bytes			
		Maximum number of registrable tag sets		32 (1 connection = 1 tag set)			
		Maximum tag	set size	600 bytes (Two bytes are used if Controller status is inc	luded in the tag set.)		
		Multi-cast pac	ket filter *8	Supported.			
		Class 3 (number of connections)		32 (clients plus server)			
	Cip message service: Explicit messages	UCMM (non- connection type)	Maximum number of clients that can communicate at one time	32			
			Maximum number of servers that can communicate at one time	32			
	Maximum numb	ber of TCP socket service		30			
	Communication	s standard		IEC 61158 Type12	-		
	EtherCAT maste	er specifications		Class B (Feature Pack Motion Control compli	ant)		
	Physical layer			100BASE-TX			
	Modulation			Baseband			
	Baud rate			100 Mbps (100Base-TX)			
	Duplex mode			Auto			
Built-in	Topology Transmission m	iedia		Line, daisy chain, and branching  Twisted-pair cable of category 5 or higher (do	uble-shielded straight cable with aluminum		
EtherCAT Port	Maximum transi	mission distanc	e between nodes	tape and braiding) 100m			
	Maximum numb		- Johnson Houes	64			
	Range of node a			1-192			
	Maximum proce			Inputs: 5,736 bytes Outputs: 5,736 bytes (However, the maximun	n number of process data frames is 4.)		
	Maximum proce	ss data size per	slave	Inputs: 1,434 bytes Outputs: 1,434 bytes			
	Communication	s cycle		1,000/2,000/4,000 μs			
	Sync jitter			1 μs max.			
Internal clock				At ambient temperature of 55°C: -3.5 to +0.5 At ambient temperature of 25°C: -1.5 to +1.5 At ambient temperature of 0°C: -3 to +1 min 6	min error per month		

<sup>\*6.</sup> Data is updated on the line in the specified interval regardless of the number of nodes.
\*7. Means packets per second, i.e., the number of communications packets that can be sent or received in one second.
\*8. An IGMP client is mounted for the EtherNet/IP port. If an ethernet switch that supports IGMP snooping is used, filtering of unnecessary multicast packets is performed.

# **Function Specifications**

		Item		NJ101-□□□□
	Function			I/O refreshing and the user program are executed in units that are called tasks. Tasks are used to specify execution conditions and execution priority.
		Periodically executed tasks	Maximum number of primary periodic tasks	1
Tasks		Conditionally	Maximum number of periodic tasks	3
			Maximum number of event tasks	32
		executed tasks	Execution conditions	When Activate Event Task instruction is executed or when condition expression for variable is met.
	Setup	System service	monitoring settings	The execution interval and the percentage of the total user program execution time are monitored for the system services (processes that are executed by the CPU Unit separate from task execution).
		Programs		POUs that are assigned to tasks.
	POU (program organization	Function blocks		POUs that are used to create objects with specific conditions.
	units)	Functions		POUs that are used to create an object that determine unique outputs for the inputs, such as for data processing.
	Programming languages	Types		Ladder diagrams *1 and structured text (ST)
	Namespaces			A concept that is used to group identifiers for POU definitions.
	Variables	External access of variables	Network variables	The function which allows access from the HMI, host computers, or other Controllers
		Data types	Boolean	BOOL
			Bit strings	BYTE, WORD, DWORD, LWORD
			Integers	INT, SINT, DINT,LINT, UINT, USINT, UDINT, ULINT
			Real numbers	REAL, LREAL
			Durations	TIME
			Dates	DATE
			Times of day	TIME_OF_DAY
			Date and time	DATE_AND_TIME
			Text strings	STRING
		Derivative data t	ypes	Structures, unions, enumerations
			Function	A derivative data type that groups together data with different variable types.
Programming	Data types		Maximum number of members	2048
		Structures	Nesting maximum levels	8
			Member data types	Basic data types, structures, unions, enumerations, array variables
			Specifying member offsets	You can use member offsets to place structure members at any memory locations.
			Function	A derivative data type that groups together data with different variable types.
		Unions	Maximum number of members	4
			Member data types	BOOL, BYTE, WORD, DWORD, LWORD
		Enumerations	Function	A derivative data type that uses text strings called enumerators to express variable values.
			Function	An array is a group of elements with the same data type. You specify the number (subscript) of the element from the first element to specify the element.
			Maximum number of dimensions	3
	Data type	Array specifications	Maximum number of elements	65535
	attributes		Array specifications for FB Instances	Supported.
		Range specifica	tions	You can specify a range for a data type in advance. The data type can take only values that are in the specified range.
		Libraries		User libraries

<sup>\*1.</sup> Inline ST is supported. (Inline ST is ST that is written as an element in a ladder diagram.)

		Item		NJ101-□□□
	Control modes			position control, velocity control, torque control
	Axis types			Servo axes, virtual servo axes, encoder axes, and virtual encoder axes
		can be managed		Command positions and actual positions
	T CONTONIO LITAR C	Jan 50 managoa	Absolute	Positioning is performed for a target position that is specified with an absolute value.
			Relative	Positioning is performed for a specified travel distance from the command current
		Single-axis position	Interrupt feeding	position.  Positioning is performed for a specified travel distance from the position where an
		control	Cyclic synchronous absolute positioning	A positioning command is output each control period in Position Control Mode.
			Velocity control	Velocity control is performed in Position Control Mode.
		Single-axis velocity control	Cyclic synchronous velocity control	A velocity command is output each control period in Velocity Control Mode.
		Single-axis torque control	Torque control	The torque of the motor is controlled.
			Starting cam operation	A cam motion is performed using the specified cam table.
			Ending cam operation	The cam motion for the axis that is specified with the input parameter is ended.
			Starting gear operation	A gear motion with the specified gear ratio is performed between a master axis and slave axis.
		Single-axis	Positioning gear operation	A gear motion with the specified gear ratio and sync position is performed between master axis and slave axis.
		synchronized control	Ending gear operation	The specified gear motion or positioning gear motion is ended.
			Synchronous positioning	Positioning is performed in sync with a specified master axis.
			Master axis phase shift	The phase of a master axis in synchronized control is shifted.
Motion Control			Combining axes	The command positions of two axes are added or subtracted and the result is output as the command position.
2		Single-axis	Powering the servo	The Servo in the Servo Drive is turned ON to enable axis motion.
	Single-axis	manual	Jogging	An axis is jogged at a specified target velocity.
		operation	Resetting axis	Axes errors are cleared.
			errors Homing	A motor is operated and the limit signals, home proximity signal, and home signal are
			Homing with parameter	used to define home.  Specifying the parameter, a motor is operated and the limit signals, home proximity signal, and home signal are used to define home.
			High-speed homing	
			<u> </u>	Positioning is performed for an absolute target position of 0 to return to home.
			Stopping Immediately	An axis is decelerated to a stop at the specified rate.  An axis is stopped immediately.
			Setting override	The target velocity of an axis can be changed.
			Changing the current position	The command current position or actual current position of an axis can be changed any position.
		Auxiliary functions for	Enabling external latches	The position of an axis is recorded when a trigger occurs.
		single-axis control	Disabling external latches	The current latch is disabled.
			Zone monitoring	You can monitor the command position or actual position of an axis to see when it is within a specified range (zone).
			Enabling digital cam switches	You can turn a digital output ON and OFF according to the position of an axis.
			Monitoring axis following error	You can monitor whether the difference between the command positions or actual positions of two specified axes exceeds a threshold value.
			Resetting the following error	The error between the command current position and actual current position is set t 0.
			Torque limit	The torque control function of the Servo Drive can be enabled or disabled and the torque limits can be set to control the output torque.
			Command position compensation	The function which compensate the position for the axis in operation.
			Start velocity	You can set the initial velocity when axis motion starts.

		Item		NJ101-□□□□
			Absolute linear interpolation	Linear interpolation is performed to a specified absolute position.
			Relative linear interpolation	Linear interpolation is performed to a specified relative position.
		Multi-axes coordinated control	Circular 2D interpolation	Circular interpolation is performed for two axes.
		Control	Axes group cyclic synchronous absolute positioning	A positioning command is output each control period in Position Control Mode.
			Resetting axes group errors	Axes group errors and axis errors are cleared.
	Axes groups		Enabling axes groups	Motion of an axes group is enabled.
			Disabling axes groups	Motion of an axes group is disabled.
		Auxiliary functions for	Stopping axes groups	All axes in interpolated motion are decelerated to a stop.
		multi-axes coordinated control	Immediately stopping axes groups	All axes in interpolated motion are stopped immediately.
			Setting axes group override factors	The blended target velocity is changed during interpolated motion.
			Reading axes group positions	The command current positions and actual current positions of an axes group can be read.
			Changing the axes in an axes group	The Composition Axes parameter in the axes group parameters can be overwritten temporarily.
	Common items	Cams	Setting cam table properties	The end point index of the cam table that is specified in the input parameter is changed.
			Saving cam tables	The cam table that is specified with the input parameter is saved in non-volatile memory in the CPU Unit.
			Generating cam tables	The cam table that is specified with the input parameter is generated from the cam property and cam node.
Motion Control		Parameters	Writing MC settings Changing axis	Some of the axis parameters or axes group parameters are overwritten temporarily.
<b>*2</b>		Count modes	parameters	You can access and change the axis parameters from the user program.
		Unit conversions		You can select either Linear Mode (finite length) or Rotary Mode (infinite length).  You can set the display unit for each axis according to the machine.
		Acceleration/ deceleration control	Automatic acceleration/ deceleration control	Jerk is set for the acceleration/deceleration curve for an axis motion or axes group motion.
			Changing the acceleration and deceleration rates	You can change the acceleration or deceleration rate even during acceleration or deceleration.
		In-position chec	k	You can set an in-position range and in-position check time to confirm when positioning is completed.
		Stop method		You can set the stop method to the immediate stop input signal or limit input signal.
		Re-execution of instructions	motion control	You can change the input variables for a motion control instruction during execution and execute the instruction again to change the target values during operation.
	Auxiliary functions	Multi-execution instructions (Bu	of motion control ffer Mode)	You can specify when to start execution and how to connect the velocities between operations when another motion control instruction is executed during operation.
		Continuous axe (Transition Mod	s group motions e)	You can specify the Transition Mode for multi-execution of instructions for axes group operation.
			Software limits	Software limits are set for each axis.  The error between the command current value and the actual current value is
		Manitaria	Following error  Velocity, acceleration	monitored for an axis.
		Monitoring functions	rate, deceleration rate, torque, interpolation velocity, interpolation acceleration rate, and interpolation deceleration rate	You can set and monitor warning values for each axis and each axes group.
		Absolute encod	er support	You can use an OMRON G5-Series Servomotor with an Absolute Encoder to eliminate the need to perform homing at startup.
		Input signal log	ic inversion	You can inverse the logic of immediate stop input signal, positive limit input signal, negative limit input signal, or home proximity input signal.
	External interfac	ce signals		The Servo Drive input signals listed on the right are used. Home signal, home proximity signal, positive limit signal, negative limit signal, immediate stop signal, and interrupt input signal

**<sup>\*2.</sup>** Supported only by the NJ101-1000.

	Item			NJ101-□□□□		
Unit (I/O)	EtherCAT slaves	Maximum numb	er of slaves	64		
management	<b>CJ-series Units</b>	Maximum numb	er of Units	40		
	Peripheral USB	port		A port for communications with various kinds of Support Software running on a personal computer.		
		Communications protocol		TCP/IP, UDP/IP		
		CIP communications	Tag data links	Programless cyclic data exchange is performed with the devices on the EtherNet/IP network.		
		service	Message communications	CIP commands are sent to or received from the devices on the EtherNet/IP network.		
	EtherNet/IP		Socket services	Data is sent to and received from any node on Ethernet using the UDP or TCP protocol.  Socket communications instructions are used.		
	port		FTP client	File can be read from or written to computers at other Ethernet nodes from the CPU Unit. FTP client communications instructions are used.		
		TCP/IP applications	FTP server	Files can be read from or written to the SD Memory Card in the CPU Unit from computers at other Ethernet nodes.		
Communications				Automatic clock adjustment	Clock information is read from the NTP server at the specified time or at a specified interval after the power supply to the CPU Unit is turned ON. The internal clock time in the CPU Unit is updated with the read time.	
			SNMP agent	Built-in EtherNet/IP port internal status information is provided to network management software that uses an SNMP manager.		
	EtherCAT port	Supported services	Process data communications	A communications method to exchange control information in cyclic communications between the EtherCAT master and slaves.  This communications method is defined by CoE.		
			SDO communications	A communications method to exchange control information in noncyclic event communications between EtherCAT master and slaves.  This communications method is defined by CoE.		
		Network scanning		Information is read from connected slave devices and the slave configuration is automatically generated.		
		DC (distributed clock)		Time is synchronized by sharing the EtherCAT system time among all EtherCAT devices (including the master).		
		Packet monitoring		The frames that are sent by the master and the frames that are received by the master can be saved. The data that is saved can be viewed with WireShark or other applications.		
		Enable/disable s	settings for slaves	The slaves can be enabled or disabled as communications targets.		
		Disconnecting/o	onnecting slaves	Temporarily disconnects a slave from the EtherCAT network for maintenance, such as for replacement of the slave, and then connects the slave again.		
		Supported application protocol	CoE	SDO messages of the CAN application can be sent to slaves via EtherCAT.		
	Communications	instructions		The following instructions are supported. CIP communications instructions, socket communications instructions, SDO message instructions, no-protocol communications instructions, protocol macro instructions, and FTP client instructions		
Operation management	RUN output contacts			The output on the NJ-P□3001 Power Supply Unit turns ON in RUN mode.		
System management	Event logs	Categories		Events are recorded in the following logs. System event log Access event log User-defined event log		
manayement		Maximum numb event log	er of events per	512		

9

Item				NJ101-□□□□	
	Online editing	Single		Programs, function blocks, functions, and global variables can be changed online.  Different operators can change different POUs across a network.	
	Forced refreshi	Forced refreshing		The user can force specific variables to TRUE or FALSE.	
		Maximum number of forced variables	Device variables for EtherCAT slaves	64	
			Device variables for CJ-series Units and variables with AT specifications	64	
	MC test run			Motor operation and wiring can be checked from the Sysmac Studio. *	
	Synchronizing			The project file in the Sysmac Studio and the data in the CPU Unit can be made the same when online.	
	Differentiation monitoring			Rising/falling edge of contacts can be monitored.	
		Maximum numb	er of contacts	8	
		Types	Single triggered trace	When the trigger condition is met, the specified number of samples are taken and then tracing stops automatically.	
Debugging		Турсз	Continuous trace	Data tracing is executed continuously and the trace data is collected by the Sysmac Studio.	
		Maximum number of simultaneous data trace		2	
		Maximum number of records		10,000	
	Data tracing	Sampling	Maximum number of sampled variables	48 variables	
		Timing of sampling		Sampling is performed for the specified task period, at the specified time, or when a sampling instruction is executed.	
		Triggered traces		Trigger conditions are set to record data before and after an event.	
			Trigger conditions	When BOOL variable changes to TRUE or FALSE Comparison of non-BOOL variable with a constant Comparison Method: Equals (=), Greater than (>), Greater than or equals (≥), Less Than (<), Less than or equals (≤), Not equal (≠)	
			Delay	Trigger position setting: A slider is used to set the percentage of sampling before and after the trigger condition is met.	
	Simulation		1	The operation of the CPU Unit is emulated in the Sysmac Studio.	
		Controller errors	Levels	Major fault, partial fault, minor fault, observation, and information	
Reliability functions	Self-diagnosis	User-defined errors		User-defined errors are registered in advance and then records are created by executing instructions.	
		Levels		8 levels	
	Protecting software assets and preventing operating mistakes	CPU unit names and serial IDs		When going online to a CPU Unit from the Sysmac Studio, the CPU Unit name in the project is compared to the name of the CPU Unit being connected to.	
Security			User program transfer with no restoration information	You can prevent reading data in the CPU Unit from the Sysmac Studio.	
		Protection	CPU Unit write protection	You can prevent writing data to the CPU Unit from the Sysmac Studio or SD Memory Card.	
			Overall project file protection	You can use passwords to protect .smc files from unauthorized opening on the Sysmac Studio.	
			Data protection	You can use passwords to protect POUs on the Sysmac Studio.	
		Verification of o	peration authority	Online operations can be restricted by operation rights to prevent damage to equipment or injuries that may be caused by operating mistakes.	
		Number of groups		5	
		Verification of user program execution ID		The user program cannot be executed without entering a user program execution ID from the Sysmac Studio for the specific hardware (CPU Unit).	

<sup>\*</sup> Supported only by the NJ101-1000.

				<b>,</b>	
Item				NJ101-□□□	
	Storage type			SD Memory Card, SDHC Memory Card	
SD memory card functions	Application	Automatic transfer from SD memory card		The data in the autoload folder on an SD Memory Card is automatically loaded when the power supply to the Controller is turned ON.	
		SD memory card operation instructions		You can access SD Memory Cards from instructions in the user program.	
		File operations from the Sysmac Studio		You can perform file operations for Controller files in the SD Memory Card and read/write standard document files on the computer.	
		SD memory card life expiration detection		Notification of the expiration of the life of the SD Memory Card is provided in a systemdefined variable and event log.	
	SD Memory Card backup functions	Operation	Using front switch	You can use front switch to backup, compare, or restore data.	
			Using system- defined variables	You can use system-defined variables to backup or compare data.	
Backup functions *1			Memory card operations dialog box on Sysmac Studio	Backup and verification operations can be performed from the SD Memory Card Opereations Dialog Box on the Sysmac Studio.	
			Using instruction	Backup operation can be performed by using instruction.	
		Protection	Prohibiting backing up data to the SD memory card	Prohibit SD Memory Card backup functions.	
	Sysmac Studio Controller backup functions			Backup, restore, and verification operations for Units can be performed from the Sysmac Studio.	

## **Unit Versions**

Units	Models	Unit Version
NJ101 CPU Units	NJ101-□□□	Unit version 1.10

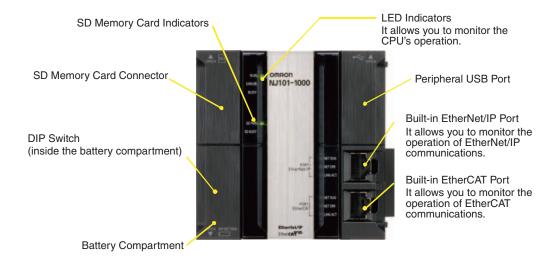

# **Unit Versions and Corresponding Sysmac Studio Versions**

The following table gives the relationship between unit versions of CPU Units and the corresponding Sysmac Studio versions.

Unit version of CPU Unit	Corresponding version of Sysmac Studio		
1.10	1.13		

### **External Interface**

An NJ101 CPU Unit (NJ101-\( \subseteq \subseteq \) provides three communications ports for external interfaces: a peripheral USB port, a built-in EtherNet/IP port and a built-in EtherCAT port.

### **Peripheral USB Port**

Item	Specification		
Physical layer	USB 2.0-compliant B-type connector		
Transmission distance	5 m max.		

Use commercially available USB cables.

Specification: USB 2.0 (or 1.1) cable (A connector - B connector), 5.0 m max.

### **Built-in EtherNet/IP Port**

Item	Specification			
Physical layer	10BASE-T/100BASE-TX			
Media access method	CSMA/CD			
Modulation	Baseband			
Topology	Star			
Baud rate	100 Mbps (100Base-TX)			
Transmission media	Straight or cross STP (shielded twisted-pair) cable of category 5 or higher.			
Transmission distance	100 m max. (distance between ethernet switch and node)			

You can connect Sysmac Studio with built-in EtherNet/IP port.

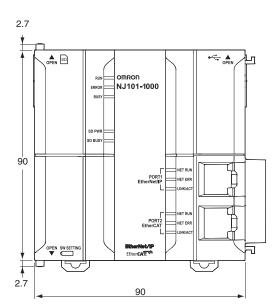

### **Built-in EtherCAT Port**

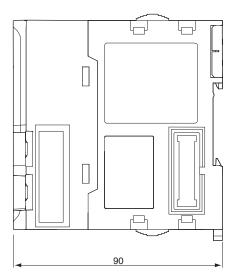

Item	Specification		
Synchronization	DC (distributed clock)		
Physical layer	100BASE-TX		
Modulation	Baseband		
Baud rate	100 Mbps (100BASE-TX).		
Duplex mode	Automatic		
Topology	Line, daisy chain and branching		
Transmission media	Shielded twisted-pair (STP); Category 5 or higher straight cable with double shielding (braiding and aluminum foil tape)		
Transmission distance	100 m max. between nodes		

Dimensions (Unit: mm)

No. W500) and NJ-series CPU Unit Software User's

### Terms and Conditions of Sale

- Offer; Acceptance. These terms and conditions (these "Terms") are deemed part of all quotes, agreements, purchase orders, acknowledgments, price lists, catalogs, manuals, brochures and other documents, whether electronic or in catalogs, manuals, brochures and other documents, whether electronic or in writing, relating to the sale of products or services (collectively, the "Products") by Omron Electronics LLC and its subsidiary companies ("Omron"). Omron objects to any terms or conditions proposed in Buyer's purchase order or other documents which are inconsistent with, or in addition to, these Terms. Prices: Payment Terms. All prices stated are current, subject to change without notice by Omron. Omron reserves the right to increase or decrease prices on any unshipped portions of outstanding orders. Payments for Products are due net 30 days unless otherwise stated in the invoice. Discounts. Cash discounts, if any, will apply only on the net amount of invoices sent to Buyer after deducting transportation charges, taxes and duties, and will be allowed only if (i) the invoice is paid according to Omron's payment terms and (ii) Buyer has no past due amounts.

- and (ii) Buyer has no past due amounts.

  Interest. Omron, at its option, may charge Buyer 1-1/2% interest per month or the maximum legal rate, whichever is less, on any balance not paid within the
- Orders. Omron will accept no order less than \$200 net billing.

  Governmental Approvals. Buyer shall be responsible for, and shall bear all costs involved in, obtaining any government approvals required for the importation or sale of the Products.
- Taxes. All taxes, duties and other governmental charges (other than general real property and income taxes), including any interest or penalties thereon, imposed directly or indirectly on Omron or required to be collected directly or indirectly by Omron for the manufacture, production, sale, delivery, importation, consumption or use of the Products sold hereunder (including customs duties and sales, excise, use, turnover and license taxes) shall be charged to and remitted by Buyer to Omron.

  Financial. If the financial position of Buyer at any time becomes unsatisfactory
- <u>Financial</u>. If the financial position of Buyer at any time becomes unsatisfactory to Omron, Omron reserves the right to stop shipments or require satisfactory security or payment in advance. If Buyer fails to make payment or otherwise comply with these Terms or any related agreement, Omron may (without liability and in addition to other remedies) cancel any unshipped portion of Products sold hereunder and stop any Products in transit until Buyer pays all amounts, including amounts payable hereunder, whether or not then due, which are owing to it by Buyer. Buyer shall in any event remain liable for all unpaid accounts. unpaid accounts
- Cancellation: Etc. Orders are not subject to rescheduling or cancellation unless Buyer indemnifies Omron against all related costs or expenses.

  10. Force Majeure. Omron shall not be liable for any delay or failure in delivery
- resulting from causes beyond its control, including earthquakes, fires, floods, strikes or other labor disputes, shortage of labor or materials, accidents to machinery, acts of sabotage, riots, delay in or lack of transportation or the requirements of any government authority.

  11. Shipping: Delivery. Unless otherwise expressly agreed in writing by Omron:
  a. Shipments shall be by a carrier selected by Omron; Omron will not drop ship
- - except in "break down" situations.
    b. Such carrier shall act as the agent of Buyer and delivery to such carrier shall
  - constitute delivery to Buyer; c. All sales and shipments of Products shall be FOB shipping point (unless oth-
- c. All sales and shipments of Products shall be FOB shipping point (unless otherwise stated in writing by Omron), at which point title and risk of loss shall pass from Omron to Buyer; provided that Omron shall retain a security interest in the Products until the full purchase price is paid;
   d. Delivery and shipping dates are estimates only; and
   e. Omron will package Products as it deems proper for protection against normal handling and extra charges apply to special conditions.

  12. Claims. Any claim by Buyer against Omron for shortage or damage to the Products occurring before delivery to the carrier must be presented in writing to Omron within 30 days of receipt of shipment and include the original transportation bill signed by the carrier noting that the carrier received the Products. portation bill signed by the carrier noting that the carrier received the Products from Omron in the condition claimed.
- Warranties. (a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.

  (b) <u>Limitations</u>. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABIL-

- ITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by tion, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty. See http://www.omron247.com or contact your Omron representative for published information.
- lished information.

  Limitation on Liability: Etc. OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY. Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.
- Indemnities. Buyer shall indemnify and hold harmless Omron Companies and their employees from and against all liabilities, losses, claims, costs and expenses (including attorney's fees and expenses) related to any claim, investigation, litigation or proceeding (whether or not Omron is a party) which arises or is alleged to arise from Buyer's acts or omissions under these Terms or in any way with respect to the Products. Without limiting the foregoing, Buyer (at its own expense) shall indemnify and hold harmless Omron and defend or settle any action brought against such Companies to the extent based on a claim that any Product made to Buyer specifications infringed intellectual property rights of another party.
- rights of another party.

  <u>Property: Confidentiality.</u> Any intellectual property in the Products is the exclusive property of Omron Companies and Buyer shall not attempt to duplicate it in any way without the written permission of Omron. Notwithstanding any charges to Buyer for engineering or tooling, all engineering and tooling shall remain the exclusive property of Omron. All information and materials supplied by Omron to Buyer relating to the Products are confidential and proprietary, and Buyer shall limit distribution thereof to its trusted employees and strictly prevent disclosure to any third party.
- prevent disclosure to any third party.

  <u>Export Controls.</u> Buyer shall comply with all applicable laws, regulations and licenses regarding (i) export of products or information; (iii) sale of products to "forbidden" or other proscribed persons; and (ii) disclosure to non-citizens of
- "forbidden" or other proscribed persons; and (ii) disclosure to non-citizens of regulated technology or information.

  Miscellaneous. (a) Waiver. No failure or delay by Omron in exercising any right and no course of dealing between Buyer and Omron shall operate as a waiver of rights by Omron. (b) Assignment. Buyer may not assign its rights hereunder without Omron's written consent. (c) Law. These Terms are governed by the law of the jurisdiction of the home office of the Omron company from which Buyer is purchasing the Products (without regard to conflict of law principles). (d) Amendment. These Terms constitute the entire agreement between Buyer and Omron relating to the Products, and no provision may be changed or waived unless in writing signed by the parties. (e) Severability If any provior waived unless in writing signed by the parties. (e) <u>Severability</u> If any provision hereof is rendered ineffective or invalid, such provision shall not invalidate any other provision. (f) Setoff. Buyer shall have no right to set off any amounts against the amount owing in respect of this invoice. (g) <u>Definitions</u>. As used herein, "<u>including</u>" means "including without limitation"; and "<u>Omron Companies</u>" (or similar words) mean Omron Corporation and any direct or indirect subsidiary or affiliate thereof.

# Certain Precautions on Specifications and Use

- Suitability of Use. Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request. Omron will provide application of use of the Product. At Buyer's lequest, omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases but the following is a non-exhaustive list of applications for which particular attention must be given:

  (i) Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this document.

  (ii) Use in consumer products or any use in significant quantities.

  (iii) Energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject and industrial consumers and consumers are consumers and status of the consumers and consumers.
  - ment, and installations subject to separate industry or government regulations. (iv) Systems, machines and equipment that could present a risk to life or prop erty. Please know and observe all prohibitions of use applicable to this Prod-
  - NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO

- ADDRESS THE RISKS, AND THAT THE OMRON'S PRODUCT IS PROP-ERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.
- Programmable Products. Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof. Performance Data. Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requires ments. Actual performance is subject to the Omron's Warranty and Limitations
- Change in Specifications. Product specifications and accessories may be change in specifications. Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time
- to confirm actual specifications of purchased Product.

  <u>Errors and Omissions.</u> Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
