

3rd June 2022

To: Valued Customer

From: Littelfuse Product Management

Subject: Marking change for fuse holder 656 658 series

For the below affected part numbers for Fuseholders, there are 2 different VDE logos on both the labels and on the holder itself today.  

Going forward, we will be keeping only one of the VDE logos going forward and removing the other VDE logo from both the label and the holder body.

Keeping : 

The affected holders would still have IEC certification and keeping VDE as the IEC certification agency.

The details of the mentioned change are as shown on the next page.

We would do the running change for shipments from 3rd July, 2022.
