

SECO-NCD5700-GEVB: Application daughter-card for NCD5700 Gate Drivers

The SECO-NCD5700-GEVB includes a high-current, stand-alone IGBT Gate Driver [NCD5700](#), a single channel Phototransistor Optocoupler [FODM217D](#), two high immunity logic Gate Output Optocouplers [FODM611](#), and all the necessary drive circuitry. It also allows users solder any MOSFET or SiC MOSFET in a TO-247 high voltage THT package.

This daughter card is compatible with the [SECO-GDBB-EVB](#) gate drivers baseboard, which allows testing up to 3 half bridge daughter cards simultaneously and comparing performances.

Evaluation/Development Tool Information					
Product	Status	Compliance	Short Description	Parts Used	Action
SECO-NCD5700-GEVB	Active	Pb-free	Application daughter-card for NCD5700 Gate Drivers	FODM217D , FODM611 , NCD5700DR2G	Buy
