

MBA002 Professional Microphone Boom Arm Stand For Studio / Broadcast or Gaming

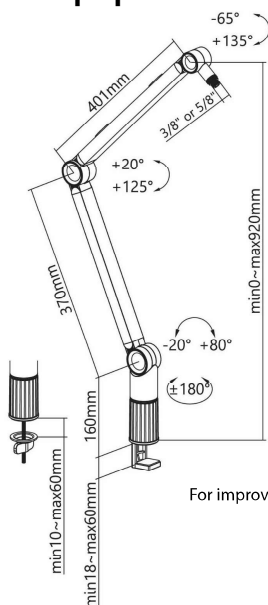

The MBA002 is a lightweight aluminium, desk mounted microphone boom arm ideal for gaming, podcasting, live streaming and more.

Thanks to 3x pivoting joints and internal spring system, microphones can be perfectly counterbalanced and positioned to capture the best sound for audio recording and voice reproduction.

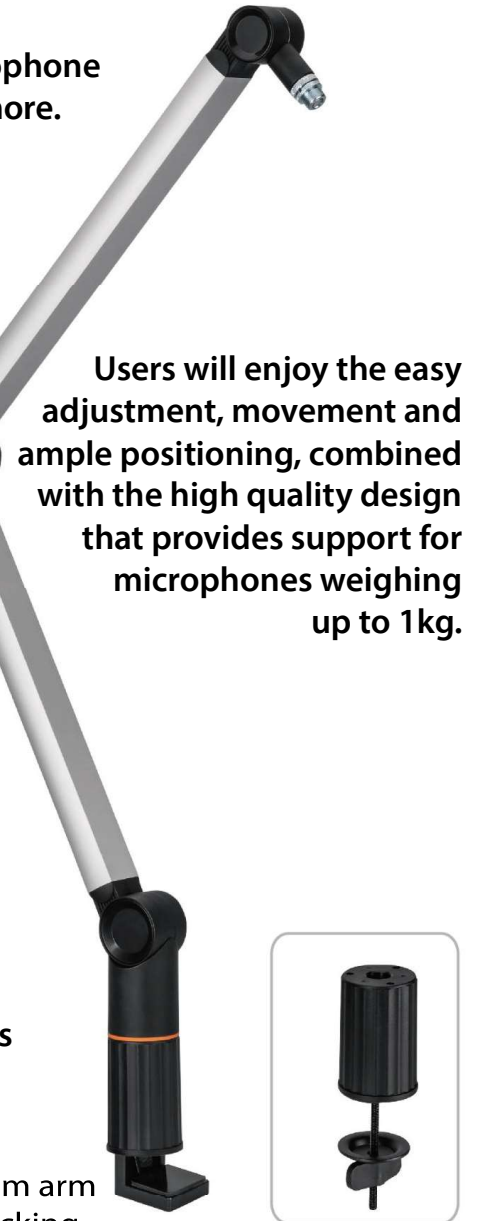

Lead management along the arms keeps everything neat and organised, and a 3/8" to 5/8" adaptor is included for universal compatibility with most microphones, shock mounts and pop filters.

- Lightweight aluminium microphone boom arm
- Spring assisted pivot joints with rotary locking
- Noise-free operation suitable for home, office and studio use
- Rotating base with 2 types of desk clamp (edge & through desk)
- Rear cable guide channel with holding clips for a neat installation
- 3/8" to 5/8" Thread adaptor
- Boom arm length: 771mm
- Height range: 0-920mm

The specifications above are correct at the time of printing this data sheet.
For improvement purposes, all specifications for this unit, including design and appearance, are subject to change without prior notice.

Users will enjoy the easy adjustment, movement and ample positioning, combined with the high quality design that provides support for microphones weighing up to 1kg.
