

# Safety Data Sheet according to (EC) No 1907/2006 as amended

Page 1 of 13

BERGQUIST HI FLOW THF 1600P known as Hi-Flow 300P

SDS No. : 640747 V001.2 Revision: 10.10.2022 printing date: 17.10.2022 Replaces version from: 23.08.2022

# SECTION 1: Identification of the substance/mixture and of the company/undertaking

## 1.1. Product identifier

BERGQUIST HI FLOW THF 1600P known as Hi-Flow 300P

- **1.2. Relevant identified uses of the substance or mixture and uses advised against** Intended use: Thermal Interface Material
- **1.3. Details of the supplier of the safety data sheet** Henkel AG & Co. KGaA Henkelstr. 67 40589 Düsseldorf

Germany

Phone: +49 211 797 0

SDSinfo.Adhesive@henkel.com For Safety Data Sheet updates please visit our website https://mysds.henkel.com/index.html#/appSelection or www.henkeladhesives.com.

# 1.4. Emergency telephone number

24 Hours Emergency Tel: +44 (0)1442 278497

# **SECTION 2: Hazards identification**

### 2.1. Classification of the substance or mixture

**Classification (CLP):** 

The substance or mixture is not hazardous according to Regulation (EC) No 1272/2008 (CLP).

### 2.2. Label elements

### Label elements (CLP):

The substance or mixture is not hazardous according to Regulation (EC) No 1272/2008 (CLP).

**Supplemental information** Safety data sheet available on request.

## 2.3. Other hazards

None if used properly.

Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very Bioaccumulative (vPvB) criteria.

# Following substances are present in a concentration >= 0,1% and fulfill the criteria for PBT/vPvB, or were identified as endocrine disruptor (ED):

This mixture does not contain any substances in concentration  $\geq$  the concentration limit that are assessed to be a PBT, vPvB or ED.

# **SECTION 3: Composition/information on ingredients**

### 3.2. Mixtures

### Declaration of the ingredients according to CLP (EC) No 1272/2008:

| Hazardous components<br>CAS-No.<br>EC Number<br>REACH-Reg No.  | Concentration | Classification  | Specific Conc. Limits, M-<br>factors and ATEs | Add.<br>Information |
|--|---------------|---|---|---------------------|
| N,N-dimethylacetamide<br>127-19-5<br>204-826-4                 | 0,1-< 0,3 %   | Acute Tox. 4, Dermal, H312<br>Acute Tox. 4, Inhalation, H332<br>Repr. 1B, H360D |   | SVHC<br>EU OEL      |
| diboron trioxide<br>1303-86-2<br>215-125-8<br>01-2119486655-24 | 0,1-< 0,3 %   | Repr. 1B, H360FD  |   | SVHC                |

For full text of the H - statements and other abbreviations see section 16 "Other information". Substances without classification may have community workplace exposure limits available.

# **SECTION 4: First aid measures**

### 4.1. Description of first aid measures

Inhalation: Move to fresh air. If symptoms persist, seek medical advice.

Skin contact: Rinse with running water and soap. Obtain medical attention if irritation persists.

Eye contact: Rinse immediately with plenty of running water (for 10 minutes), seek medical attention from a specialist.

Ingestion: Rinse mouth, drink 1-2 glasses of water, do not induce vomiting, consult a doctor.

# 4.2. Most important symptoms and effects, both acute and delayed

Prolonged or repeated contact may cause eye irritation.

Prolonged or repeated contact may cause skin irritation.

# 4.3. Indication of any immediate medical attention and special treatment needed

See section: Description of first aid measures

# **SECTION 5: Firefighting measures**

**5.1. Extinguishing media Suitable extinguishing media:** water, carbon dioxide, foam, powder

# Extinguishing media which must not be used for safety reasons:

High pressure waterjet

### 5.2. Special hazards arising from the substance or mixture

In the event of a fire, carbon monoxide (CO), carbon dioxide (CO2) and nitrogen oxides (NOx) can be released. In case of fire, keep containers cool with water spray.

# **5.3. Advice for firefighters**

Wear self-contained breathing apparatus and full protective clothing, such as turn-out gear.

### Additional information:

In case of fire, keep containers cool with water spray.

# **SECTION 6: Accidental release measures**

### 6.1. Personal precautions, protective equipment and emergency procedures

Avoid contact with skin and eyes. Wear protective equipment. Ensure adequate ventilation.

### 6.2. Environmental precautions

Do not empty into drains / surface water / ground water.

#### 6.3. Methods and material for containment and cleaning up

Scrape up as much material as possible. Sweep up spilled material. Avoid creating dust. Store in a partly filled, closed container until disposal. Dispose of contaminated material as waste according to Section 13.

### 6.4. Reference to other sections

See advice in section 8

# **SECTION 7: Handling and storage**

**7.1. Precautions for safe handling** Avoid skin and eye contact.

See advice in section 8

### Hygiene measures:

Good industrial hygiene practices should be observed. Wash hands before work breaks and after finishing work. Do not eat, drink or smoke while working.

#### 7.2. Conditions for safe storage, including any incompatibilities

Ensure good ventilation/extraction. Keep container tightly sealed. Refer to Technical Data Sheet

### 7.3. Specific end use(s)

Thermal Interface Material

# **SECTION 8: Exposure controls/personal protection**

# 8.1. Control parameters

# **Occupational Exposure Limits**

| [N,N-<br>DIMETHYLACETAMIDE]      | mide              |                     |                              |                                      |                               |

### 8.2. Exposure controls:

Engineering controls: Ensure good ventilation/extraction.

Respiratory protection: Ensure adequate ventilation. An approved mask or respirator fitted with an organic vapour cartridge should be worn if the product is used in a poorly ventilated area Filter type: A (EN 14387)

Hand protection:

Chemical-resistant protective gloves (EN 374).

Suitable materials for short-term contact or splashes (recommended: at least protection index 2, corresponding to > 30 minutes permeation time as per EN 374):

nitrile rubber (NBR; >= 0.4 mm thickness)

Suitable materials for longer, direct contact (recommended: protection index 6, corresponding to > 480 minutes permeation time as per EN 374):

nitrile rubber (NBR; >= 0.4 mm thickness)

This information is based on literature references and on information provided by glove manufacturers, or is derived by analogy with similar substances. Please note that in practice the working life of chemical-resistant protective gloves may be considerably shorter than the permeation time determined in accordance with EN 374 as a result of the many influencing factors (e.g. temperature). If signs of wear and tear are noticed then the gloves should be replaced.

Eye protection: Safety glasses with sideshields or chemical safety goggles should be worn if there is a risk of splashing. Protective eye equipment should conform to EN166.

Skin protection:

Wear suitable protective clothing.

Protective clothing should conform to EN 14605 for liquid splashes or to EN 13982 for dusts.

Advices to personal protection equipment:

The information provided on personal protective equipment is for guidance purposes only. A full risk assessment should be conducted prior to using this product to determine the appropriate personal protective equipment to suit local conditions. Personal protective equipment should conform to the relevant EN standard.

# **SECTION 9: Physical and chemical properties**

### 9.1. Information on basic physical and chemical properties

| Physical state             | solid  |
|----------------------------|--|
| Delivery form              | solid  |
| Colour                     | green  |
| Odor                       | None   |
| Melting point              | Not applicable, Decomposes.                                |
| Solidification temperature | Not applicable, Product is a solid.                        |
| Initial boiling point      | > 200 °C (> 392 °F)  |
| Flammability               | The product is not flammable.                              |
| Explosive limits           | Not applicable, Product is a solid.                        |
| Flash point                | Not applicable, Product is a solid.                        |
| Auto-ignition temperature  | Not applicable, Product is a solid.                        |
| Decomposition temperature  | Not applicable, Substance/mixture is not self-reactive, no |
|                            |  |

pH Viscosity (kinematic) Solubility (qualitative) (20 °C (68 °F); Solvent: Water) Partition coefficient: n-octanol/water

Vapour pressure (20 °C (68 °F)) Density (20 °C (68 °F)) Bulk density Relative vapour density: Particle characteristics

### **9.2.** Other information

Other information not applicable for this product

organic peroxide and does not decompose under foreseen conditions of use Not applicable, Product is non-soluble (in water). Not applicable, Product is a solid. Insoluble

Not applicable Mixture < 1 hPa

2,1 - 2,3 g/cm3

2,2 g/cm3 Not applicable, Product is a solid. Not applicable Product is not powder.

# **SECTION 10: Stability and reactivity**

**10.1. Reactivity** Reaction with strong acids. Reacts with strong oxidants.

**10.2. Chemical stability** Stable under recommended storage conditions.

# 10.3. Possibility of hazardous reactions

See section reactivity

# 10.4. Conditions to avoid

Stable under normal conditions of storage and use.

# 10.5. Incompatible materials

See section reactivity.

# **10.6.** Hazardous decomposition products

carbon oxides.

# **SECTION 11: Toxicological information**

# General toxicological information:

Prolonged or repeated contact may cause skin irritation. Prolonged or repeated contact may cause eye irritation.

### 1.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

### Acute oral toxicity:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances<br>CAS-No. | Value<br>type | Value         | Species | Method                                   |
|---------------------------------|---------------|---------------|---------|--|
| N,N-dimethylacetamide 127-19-5  | LD50          | 4.930 mg/kg   | rat     | OECD Guideline 401 (Acute Oral Toxicity) |
| diboron trioxide<br>1303-86-2   | LD50          | > 2.600 mg/kg | rat     | OECD Guideline 401 (Acute Oral Toxicity) |

### Acute dermal toxicity:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances<br>CAS-No. | Value<br>type | Value         | Species | Method        |
|---------------------------------|---------------|---------------|---------|---------------|
| diboron trioxide<br>1303-86-2   | LD50          | > 2.000 mg/kg | rabbit  | not specified |

### Acute inhalative toxicity:

No data available.

### Skin corrosion/irritation:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances<br>CAS-No. | Result         | Exposure<br>time | Species | Method        |
|---------------------------------|----------------|------------------|---------|---------------|
| diboron trioxide<br>1303-86-2   | not irritating | 24 h             | rabbit  | not specified |

### Serious eye damage/irritation:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances<br>CAS-No. | Result         | Exposure<br>time | Species | Method  |
|---------------------------------|----------------|------------------|---------|---|
| diboron trioxide<br>1303-86-2   | not irritating |                  | rabbit  | OECD Guideline 405 (Acute Eye Irritation / Corrosion) |

# Respiratory or skin sensitization:

The mixture is classified based on threshold limits referring to the classified substances present in the mixture.

| Hazardous substances<br>CAS-No. | Result          | Test type    | Species    | Method                                  |
|---------------------------------|-----------------|--------------|------------|---|
| diboron trioxide<br>1303-86-2   | not sensitising | Buehler test | guinea pig | OECD Guideline 406 (Skin Sensitisation) |

### Germ cell mutagenicity:

The mixture is classified based on threshold limits referring to the classified substances present in the mixture.

| Hazardous substances<br>CAS-No. | Result   | Type of study /<br>Route of<br>administration            | Metabolic<br>activation /<br>Exposure time | Species | Method   |
|---------------------------------|----------|--|--|---------|--|
| diboron trioxide<br>1303-86-2   | negative | bacterial reverse<br>mutation assay (e.g<br>Ames test)   | with and without                           |         | not specified  |
| diboron trioxide<br>1303-86-2   | negative | mammalian cell<br>gene mutation assay                    | with and without                           |         | not specified  |
| diboron trioxide<br>1303-86-2   | negative | sister chromatid<br>exchange assay in<br>mammalian cells | with and without                           |         | not specified  |
| diboron trioxide<br>1303-86-2   | negative | oral: gavage   |  | mouse   | OECD Guideline 474<br>(Mammalian Erythrocyte<br>Micronucleus Test) |

### Carcinogenicity

The mixture is classified based on threshold limits referring to the classified substances present in the mixture.

| Hazardous components | Result           | Route of    | Exposure     | Species | Sex         | Method             |
|----------------------|------------------|-------------|--------------|---------|-------------|--------------------|
| CAS-No.              |                  | application | time /       |         |             |                    |
|                      |                  |             | Frequency    |         |             |                    |
|                      |                  |             | of treatment |         |             |                    |
| diboron trioxide     | not carcinogenic | oral: feed  | 103 w        | mouse   | male/female | OECD Guideline 451 |
| 1303-86-2            |                  |             | daily        |         |             | (Carcinogenicity   |
|                      |                  |             |              |         |             | Studies)           |

# **Reproductive toxicity:**

The mixture is classified based on threshold limits referring to the classified substances present in the mixture.

| Hazardous substances<br>CAS-No. | Result / Value                          | Test type                     | Route of application | Species | Method        |
|---------------------------------|---|-------------------------------|----------------------|---------|---------------|
| diboron trioxide<br>1303-86-2   | NOAEL P 336 mg/kg<br>NOAEL F1 100 mg/kg | three-<br>generation<br>study | oral: feed           | rat     | not specified |
|                                 | NOAEL F2 100 mg/kg                      |                               |                      |         |               |

# STOT-single exposure:

No data available.

# STOT-repeated exposure::

The mixture is classified based on threshold limits referring to the classified substances present in the mixture.

| Hazardous substances<br>CAS-No. | Result / Value  | Route of application | Exposure time /<br>Frequency of<br>treatment | Species | Method        |
|---------------------------------|-----------------|----------------------|--|---------|---------------|
| diboron trioxide<br>1303-86-2   | NOAEL 100 mg/kg | oral: feed           | 2 y<br>daily                                 | rat     | not specified |

# Aspiration hazard:

No data available.

# 11.2 Information on other hazards

not applicable

# **SECTION 12: Ecological information**

### General ecological information:

Do not empty into drains / surface water / ground water.

### 12.1. Toxicity

### Toxicity (Fish):

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances           | Value | Value      | Exposure time | Species  | Method   |
|--------------------------------|-------|------------|---------------|--|--|
| CAS-No.                        | type  |            |               |  |  |
| N,N-dimethylacetamide 127-19-5 | LC50  | > 500 mg/l | 96 h          | Leuciscus idus                                 | DIN 38412-15   |
| diboron trioxide<br>1303-86-2  | LC50  | 513,3 mg/l | 96 h          | Pimephales promelas                            | other guideline:   |
| diboron trioxide<br>1303-86-2  | NOEC  | 41,2 mg/l  | 34 d          | Danio rerio (reported as<br>Brachydanio rerio) | OECD Guideline 210 (fish early lite stage toxicity test) |

### Toxicity (Daphnia):

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances           | Value | Value       | Exposure time | Species            | Method  |
|--------------------------------|-------|-------------|---------------|--------------------|---|
| CAS-No.                        | type  |             |               |                    |   |
| N,N-dimethylacetamide 127-19-5 | EC50  | > 500 mg/l  | 48 h          | 1 1                | EU Method C.2 (Acute<br>Toxicity for Daphnia) |
| diboron trioxide<br>1303-86-2  | EC50  | 586,04 mg/l | 48 h          | Ceriodaphnia dubia | other guideline:                              |

### Chronic toxicity to aquatic invertebrates

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances | Value | Value     | Exposure time | Species       | Method                    |
|----------------------|-------|-----------|---------------|---------------|---------------------------|
| CAS-No.              | type  |           |               |               |                           |
| diboron trioxide     | NOEC  | 69,6 mg/l | 21 d          | Daphnia magna | OECD 211 (Daphnia         |
| 1303-86-2            |       | -         |               |               | magna, Reproduction Test) |

### Toxicity (Algae):

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances<br>CAS-No.   | Value<br>type | Value      | Exposure time | Species  | Method   |
|-----------------------------------|---------------|------------|---------------|--|--|
| N,N-dimethylacetamide<br>127-19-5 | EC50          | > 500 mg/l | 72 h          |  | OECD Guideline 201 (Alga,<br>Growth Inhibition Test) |
| diboron trioxide<br>1303-86-2     | EC50          | 337,5 mg/l | 72 h          | Pseudokirchneriella subcapitata<br>(reported as Raphidocelis<br>subcapitata) | OECD Guideline 201 (Alga,<br>Growth Inhibition Test) |
| diboron trioxide<br>1303-86-2     | EC10          | 225,4 mg/l | 72 h          |  | OECD Guideline 201 (Alga,<br>Growth Inhibition Test) |

### Toxicity to microorganisms

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances  | Value | Value        | Exposure time | Species | Method        |
|-----------------------|-------|--------------|---------------|---------|---------------|
| CAS-No.               | type  |              |               |         |               |
| N,N-dimethylacetamide | EC10  | > 1.995 mg/l | 30 min        |         | not specified |
| 127-19-5              |       |              |               |         | -             |

### 12.2. Persistence and degradability

The product is not biodegradable.

| Hazardous substances<br>CAS-No.   | Result  | Test type | Degradability | Exposure<br>time | Method  |
|-----------------------------------|---|-----------|---------------|------------------|---|
| N,N-dimethylacetamide<br>127-19-5 | inherently biodegradable                            | aerobic   | 96 %          | 5 d              | OECD Guideline 302 B (Inherent<br>biodegradability: Zahn-<br>Wellens/EMPA Test) |
| N,N-dimethylacetamide<br>127-19-5 | readily biodegradable, but<br>failing 10-day window | aerobic   | 70 %          | 28 d             | OECD Guideline 301 C (Ready<br>Biodegradability: Modified MITI<br>Test (I))     |

### 12.3. Bioaccumulative potential

No data available.

### 12.4. Mobility in soil

No data available for the product.

No substance data available.

# 12.5. Results of PBT and vPvB assessment

| Hazardous substances | PBT / vPvB   |
|----------------------|--|
| CAS-No.              |  |
| diboron trioxide     | According to Annex XIII of regulation (EC) 1907/2006 a PBT and vPvB assessment shall not |
| 1303-86-2            | be conducted for inorganic substances.   |

### 12.6. Endocrine disrupting properties

not applicable

# 12.7. Other adverse effects

No data available.

# **SECTION 13: Disposal considerations**

## 13.1. Waste treatment methods

Product disposal:

Do not empty into drains / surface water / ground water. Dispose of in accordance with local and national regulations.

### Disposal of uncleaned packages:

After use, tubes, cartons and bottles containing residual product should be disposed of as chemically contaminated waste in an authorised legal land fill site or incinerated.

Waste code

08 04 09\* waste adhesives and sealants containing organic solvents and other dangerous substances

The valid EWC waste code numbers are source-related. The manufacturer is therefore unable to specify EWC waste codes for the articles or products used in the various sectors. The EWC codes listed are intended as a recommendation for users. We will be happy to advise you.

|       | SECTION 14: Transport information                         |
|-------|---|
| 14.1. | UN number or ID number                                    |
|       | Not hazardous according to RID, ADR, ADN, IMDG, IATA-DGR. |
| 14.2. | UN proper shipping name                                   |
|       | Not hazardous according to RID, ADR, ADN, IMDG, IATA-DGR. |
| 14.3. | Transport hazard class(es)                                |
|       | Not hazardous according to RID, ADR, ADN, IMDG, IATA-DGR. |
| 14.4. | Packing group   |
|       | Not hazardous according to RID, ADR, ADN, IMDG, IATA-DGR. |
| 14.5. | Environmental hazards                                     |
|       | Not hazardous according to RID, ADR, ADN, IMDG, IATA-DGR. |
| 14.6. | Special precautions for user                              |
|       | Not hazardous according to RID, ADR, ADN, IMDG, IATA-DGR. |
| 14.7. | Maritime transport in bulk according to IMO instruments   |
|       | not applicable  |

# **SECTION 15: Regulatory information**

| 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture |                |                |  |
|--|----------------|----------------|--|
| Ozone Depleting Substanc   | Not applicable |                |  |
| Prior Informed Consent (P  | Not applicable |                |  |
| Persistent organic pollutants (Regulation (EU) 2019/1021):   |                | Not applicable |  |
| VOC content  | < 3 %          |                |  |
| (2010/75/EC)   |                |                |  |

**15.2. Chemical safety assessment** A chemical safety assessment has not been carried out.

# **SECTION 16: Other information**

The labelling of the product is indicated in Section 2. The full text

of all abbreviations indicated by codes in this safety data sheet are as follows:

H312 Harmful in contact with skin.

H332 Harmful if inhaled.

H360D May damage the unborn child.

H360FD May damage fertility. May damage the unborn child.

| ED:         | Substance identified as having endocrine disrupting properties                           |
|-------------|--|
| EU OEL:     | Substance with a Union workplace exposure limit  |
| EU EXPLD 1: | Substance listed in Annex I, Reg (EC) No. 2019/1148                                      |
| EU EXPLD 2  | Substance listed in Annex II, Reg (EC) No. 2019/1148                                     |
| SVHC:       | Substance of very high concern (REACH Candidate List)                                    |
| PBT:        | Substance fulfilling persistent, bioaccumulative and toxic criteria                      |
| PBT/vPvB:   | Substance fulfilling persistent, bioaccumulative and toxic plus very persistent and very |
|             | bioaccumulative criteria   |
| vPvB:       | Substance fulfilling very persistent and very bioaccumulative criteria                   |

### **Further information:**

This Safety Data Sheet has been produced for sales from Henkel to parties purchasing from Henkel, is based on Regulation (EC) No 1907/2006 and provides information in accordance with applicable regulations of the European Union only. In that respect, no statement, warranty or representation of any kind is given as to compliance with any statutory laws or regulations of any other jurisdiction or territory other than the European Union. When exporting to territories other than the European Union, please consult with the respective Safety Data Sheet of the concerned territory to ensure compliance or liaise with Henkel's Product Safety and Regulatory Affairs Department (SDSinfo.Adhesive@henkel.com) prior to export to other territories than the European Union.

This information is based on our current level of knowledge and relates to the product in the state in which it is delivered. It is intended to describe our products from the point of view of safety requirements and is not intended to guarantee any particular properties.

### Dear Customer,

Henkel is committed to creating a sustainable future by promoting opportunities along the entire value chain. If you would like to contribute by switching from a paper to the electronic version of SDS, please contact the local Customer Service representative. We recommend to use a non-personal email address (e.g. SDS@your\_company.com).

Relevant changes in this safety data sheet are indicated by vertical lines at the left margin in the body of this document. Corresponding text is displayed in a different color on shadowed fields.
