Replacement Cutting Blades

Cutting blade for TRCSPDY2 crimp tool

This replacement blade ensures that crimping performance level is maintained throughout the life of the heavy duty TRCSPDY2 ***SPEEDY RJ45*** crimp tool.

Note: Different core sizes and insulation materials wear the blade differently. For Category 6A cable, to maintain excellent performance, it is recommended that the blade is replaced after every 1000 terminations.

Features

- High performance cutting blade guarantees a flush wire trim on extended conductors

Specifications

- Material: tool steel

Product code: TBSPDY2

Packaging

Supplied in individual poly bag, then in packs of 10
