

 HARTING Pushing Performance	HARTING Product Change Notification	PCN
--	--	------------

Business Unit: HARTING Electric

PCN/22/022/C+N-US

Product Range: Han-Modular®

Date: 12/01/2022

Title: Han-Modular® Metal Docking Frame Voltage Rating

Details of the Product Changes

1. Concerned Part Numbers
09140061702, 09140061703, 09140061706, 09140061707, 09140061712, 09140061716, 09140061717, 09140161702, 09140161703, 09140161706, 09140161707, 09140161712, 09140161716, 09140161717, 09140241702, 09140241703, 09140241705, 09140241706, 09140241712, 09140241716
2. Description of Changes/News
No changes to the physical specifications.
3. Impact on Product Specification
<p>During ongoing product monitoring, we have noticed that adverse installation and/or environmental conditions for the above-mentioned Han-Modular® metal docking frames can lead to a reduction in the voltage rating. Specifically for some connector modules which are specified with voltages above 630V.</p> <p>Therefore, in addition to mechanical, material, and thermal characteristics, we will specify also a maximum rated voltage, a maximum rated impulse voltage, and a pollution degree. For the mentioned docking frames, it is now specified with 630V / 6kV / 2 (Rated voltage 630V / rated impulse voltage 6 kV / pollution degree 2)</p> <p>For a complete connector the above specified voltage rating is the maximum level which can be achieved. In cases where the applied module(s) do offer lower voltage ratings, then these lower ratings are valid.</p> <p>Applications with rated voltages above 630V must be approved in coordination with HARTING, therefore please contact your local HARTING representative.</p>
4. Scheduled Date of Implementation
11/28/2022
5. Identification of Change
See HARTING eCatalog
