

# Han® Q Hybrid

Pushing Performance

## Description

We are happy to announce an addition to the Han® 3A portfolio. The new Han® Q Hybrid is a powerful versatile compact sized connector for power and signal with additional data or alternatively coding element. This is the most compact and easy to assemble rectangular hybrid power connector available on the market.

## Links to Other Materials

- [Han Q Insert B2B Page](#)
- [Hybrid for Robotics](#)

## Specs

- Power: 20A, 600V
- Signal: 10A, 250V
- Data: Cat. 5 Ethernet
- Optional coding element
- Combinable with hoods/housings up to IP69k

## Markets

- Machinery
- Robotics
- Intralogistics
- Automation

## Applications

- Packaging Equipment
- Paper Processing Machines
- Conveyor Systems
- Metal Forming
- Injection Molding
- Test and Measurement Systems

## Feature

## Advantage

## Benefit

- |                     |  |                                       |
|---------------------|--|---------------------------------------|
| ■ Crimp PE Terminal | ■ Quick assembly                                 | ■ Time and cost savings               |
| ■ Hybrid Interface  | ■ Space Savings                                  | ■ Cost savings and design flexibility |
| ■ Coding option     | ■ Physical differentiation of the same interface | ■ Increased safety                    |
