

Rack Enclosure with Side Panels 48"H x 32"D

Item # WRKSA-2432

Description

Middle Atlantic Rack Cabinets have been designed specifically to address both the needs of the equipment that is being mounted, as well as to address any limitations or restrictions of the jobsite. In addition, these racks are contractor-friendly and have been designed with many essential time-saving features including 10-32 threaded rack rail with numbered rack space increments to speed equipment loading and an adjustable rear rack rail to fit specific equipment needs. 14-gauge steel tops & bottoms plus 16-gauge seamless steel sides give this rack enclosure a 2,500 lb. weight capacity for secure mounting of all your equipment. Drop ship this cabinet directly to your next jobsite; Contact us today!
