

Wall Rack, 24"W 36"H 7.5"D 4U

Item # HDR-4

Description

Middle Atlantic's innovative design allows secure, parallel-to-the-wall mounting of rack equipment. With a vented, locking front door this enclosure is the perfect choice for mounting in non-secure areas. The upper bay mounts patch panels and pivots 100-degrees with positive stop for punch-downs. The lower bay mounts switches, hubs, and routers and pivots 15-degrees for access to rear connections. Abundant cable tie points and 24" length of hook and loop cable fasteners are included for cable management. Drop ship this enclosure directly to your jobsite saving time and money.

Features

- Abundant cable tie points and 24" length of hook and loop cable fasteners included for cable management
- Lower bay mounts switches, hubs and routers and pivots 15-degrees for access to rear connections
- Upper bay mounts patch panels and pivots 100-degrees with positive stop for punch-downs

- Vented, locking front door for mounting in non-secure areas
- Low profile wall mountable locking rack cabinet for securing valuable equipment

Application

- Data Centers
- LAN aggregation
- IDF installations
- Network Infrastructure
