

70" (40 Space) 26" Useable Depth, Pivoting Enclosure

Item # SR-4028

Description

When you want a full size enclosure but need easy access to rear equipment connections, choose the Middle Atlantic SR series pivoting wall enclosure. This enclosure mounts to a wall while the entire weight is supported by the floor through an innovative base platform design. Each enclosure can pivot 90-degrees while supporting up to 500lbs of equipment. The center section reverses for either a left or right opening. The cabinet is finished with a durable black textured powder coat. Drop ship this cabinet directly to your next jobsite.

Features

- 19" pivoting wall mount rack enclosure system for easy access to rear connections
- Available for drop shipment directly to your next jobsite
- Rugged design supports up to 500 lbs of equipment even when open
- Tool free quick mount system for easy installation at your jobsite
- Center section reverses for left or right opening to fit any jobsite layout.

Application

- Data Centers
- LAN aggregation
- IDF installations
- Network Infrastructure
