

Open Frame 4 Post Rack Cage Nut Rackrail -51U 30" Deep

Item # R4CN-5130B

Description

Mount servers and other equipment requiring cage nut mounting hardware with the R4 Series Four Post Open Frame Rack. With the ability to accommodate deeper, heavier components than a two post frame rack, the steel four post design provides a robust 1,000 lb. weight capacity. Open top accepts direct mounting of optional 6", 9" or 12" cable ladder (mounts parallel or perpendicular to front of rack). Standard cage nut Z-rail adaptor enables side mount installations. Ships flat to save space. Includes 100 6mm rack screws and cage nuts. Flat black powder coat finish.

Features

- Mount servers using the cage nut compliant rackrail
- Rack gangs to additional four post or two post open frame racks
- Open frame design facilitates unrestricted heat flow
- Includes standard Z-rail adaptor for side mount installations
- Open top accepts mounting of 6", 9" or 12" cable ladders

Application

- MDF/IDF
- Premise wiring
- Network aggregation
- Cable management
