

Inline DSL Conditioner, RJ12 (6x6) Male / Female

Item # S900LC50-I

Description

Combine a wall mount phone jack and DSL filter in a compact housing. The Wall Mount DSL Adapter mounts to an existing wall mount phone jack providing an unfiltered jack for your DSL connection plus one filtered line for voice device communications such as a phone, fax, answering machine, or Caller ID box. DSL filters isolate telephone equipment impedances that interfere with ADSL communications. Featuring mounting lugs for wall mount phones, these plates are easy to install with no special tools required.

Features

- DSL Line Filters - Filter out DSL signal interference from voice phone systems
- Easy to install with no special tools required
- Blocks unwanted DSL signal from voice phone systems
- Provides an unfiltered connection for your computer DSL modem
- Meets ANSI T1E1.4 RE 7R2 standards for DSL filter compliance
