

## StructuredGround™ TRBSK Bonding Stud Kit, Green, Zinc-Plated, PK1

TRBSK

The TRBSK Bonding Stud Kit incorporates piercing serrations to create a bond point between the rack or cabinet and painted patch panels, mounted equipment, servers, busbars, and jumpers. The thread-forming provides a bond to the rack or cabinet by removing paint from holes and minimizing metal shavings and the green color-coding to indicate bonding application.

### Specifications
