PCN Overview Description

NXP Semiconductors announces a marking change to the MPC5777C devices listed in this notification. Line four of trace code marking will be standardized from AWLYYWWZ to AWLYYWW, removing the "Z" character.

Marking change is summarized in the attached file with this notification. Upon notification effective date, customers can expect to receive either trace code marking until inventory with current trace code marking is depleted.

The update to line four of trace code marking has no impact to full product traceability. Z character remains in line five of trace code marking.

Corresponding ZVEI Delta Qualification Matrix ID: SEM-PA-13 **Reason** Standardization of product marking for manufacturing optimization. **Identification of Affected Products** Top Side Marking

Line four of trace code marking will be standardized from AWLYYWWZ to AWLYYWW, removing the "Z" character. Marking change is summarized in the attached file with this notification.

Anticipated Impact on Form, Fit, Function, Reliability or Quality

No Impact on form, fit, function, reliability or quality **Disposition of Old Products** Existing inventory will be shipped until depleted Upon notification effective date, customers can expect to receive either trace code marking until inventory with current trace code marking is depleted.
