

EAN:	4013288222190	Size:	140x70x25 mm
Part number:	05004182001	Weight:	86 g
Article number:	Bicycle Set 15	Country of origin:	CZ
		Customs tariff number:	82079030

- Innovative, extremely compact quadruple bit - only one bit for four different screw sizes
- Super space-saving solution, ideal for mobile use
- Compact, secure and very simple retainer in the Wera tyre levers
- The hexagon mounting of the tyre lever allows a torque of up to 10 Nm
- Significant weight savings and better overview of the tools when on tour

The ultra compact and lightweight bike tools with two quadruple bits and three tyre levers.

Four different screw profiles can be operated with just one bit. Significant weight savings of over 50 %. The enormous space savings make the Bicycle Set 15 perfect for mobile use. The operability of the large profiles is made possible by the spring compression of the small tips. The bit with a 1/4" hexagon drive (Wera connection series 1) can also be used with e.g. bit ratchets and bitholding screwdrivers with Rapidaptor. The 9504 tyre lever has a 1/4" mounting for using a 1/4" bit. When both 9504 tyre levers are stacked together, a 4-in-1 bit can be inserted and you get a screwdriving tool. The 9505 tyre lever serves as both valve ejector and bleeder valve. The levers and 4-in-1 bits can be clipped together, so that everything is compact and nothing will be lost.

Safely lever the tyres off of the rim

Innovative, extremely compact quadruple bit - only one bit for four different screw sizes

With the glass fibre reinforced plastic tyre levers, the tyres can be safely levered off the rim without damaging the rim. Lift off of the rim with one tyre lever, hook into a spoke and pull off the tyre with the second tyre lever. The two tyre levers can be clicked together and are therefore not lost individually.

The 9504 tyre lever with bit mounting

The 1/4" hexagon mounting in the 9504 tyre lever can mount one 1/4" bit, allowing for easy connections.

The 9505 tyre lever

The 9505 tyre lever can be used as a valve ejector for French valves (Sclaverand) and as a bleeder for car valves.

The Wera 4-in-1 bits

Four screw sizes can be operated with the 4-in-1 bits 9506 and 9507. The 4-in-1 bit 9506 for four sizes of hexagonal socket screws (3.0; 4.0; 5.0; 6.0), the 4-in-1 bit 9507 for three sizes of hexagonal socket screws (2.5; 5.0; 6.0) and one size of TORX® screws (TX 25). In order to use the larger profile, continuously press against the spring tension while screwdriving so that the smaller profile is countersunk and the larger profile can be used.

Tyre lever plus bit = screwdriving tool

When the 9504 tyre levers are stacked together, the 4-in-1 bits can be inserted in the 1/4" holder and you get a screwdriving tool.

Compact

The 4-in-1 bit is clipped into the 9504 tyre lever. The 9505 tyre lever can be attached so that the lever and bit form a compact package.
