

Dear GW Instek Partner,

Subject: **Important Product Name Change - DC Source Meter to Source Measure Unit**

We are writing to inform you about an important change regarding the name of one of our key products, GSM-20H10. Effective immediately, we will be transitioning from the name "DC Source Meter" to "Source Measure Unit."

The decision to change the product name has been driven by our commitment to upholding intellectual property rights and maintaining a strong sense of respect for other companies in our industry. While "DC Source Meter" is a general term used to describe a product combining a DC Power Source with a meter, it has come to our attention that another company believes this name is too similar to their trademark, "SourceMeter" (one-word).

At GW Instek, we firmly believe in promoting fair competition and respecting the intellectual property rights of others. It is essential for us to maintain our own intellectual property rights while avoiding any actions that could potentially infringe upon the trademark rights of others. As a result, we have made the decision to change the name of our product to alleviate any confusion or potential trademark conflicts.

We understand that this change may require some adjustments in our marketing materials, documentation, and conversations with clients. Our marketing and sales teams are working diligently to ensure a seamless transition. Rest assured, this change is solely related to the product name, and there will be no modifications or alterations to the product itself. The product specifications, features, and functionality will remain exactly as they are.

We kindly request your cooperation in implementing this change across all relevant channels, including internal and external communications, customer interactions, product documentation, and any other materials associated with the product. We encourage you to promptly update any references to the previous name to reflect the new name, **"Source Measure Unit."**

We appreciate your understanding and support as we undergo this transition. Our commitment to delivering exceptional products and services remains unchanged. Should you have any questions or require further information, please reach out to the product management team or your immediate supervisor.

Thank you for your cooperation and dedication to maintaining the highest standards of professionalism and integrity within GW Instek brands.

Sincerely,

Stephen Wu    Date: 25-May-2023
