FGM230-RB4328A

FGM230S 868-915 MHz +14 dBm Secure Vault™ Mid Radio Board

The FGM230S Radio Board is designed to work with the WSTK main board (not included) to support the development of Wireless IoT devices based on Sub-GHz wireless protocols for Proprietary, Connect, and WM-BUS. The kit includes a +14 dBm 868-915MHz radio board that provides a complete reference design for the FGM230 SiP Module.
