

2.1 x 5.5mm DC CABLES

Extension / 2 WAY / 4 WAY OPTIONS

A range of White DC cables suitable for use which have a single 2.1mm DC input socket and terminate with either single 2.1mm connector functioning as an extension cable, or 2 or 4 x 2.1mm DC connectors which can split the initial input cable to function as a splitter cable. They enable a single output to be split allowing a number of units to be powered from a single source. All cables are manufactured using high quality, heavy duty 16AWG cable meaning all of these cables can accommodate an **input current of up to 8 amps continuous (96 watts at 12V DC or 192 watts at 24V DC)**. Please see part numbers below

Part number TGR-01903-W

Single 2.1 x 5.5mm input to single 2.1 x 5.5 x 13mm output
1.5 metre length. 16AWG. 8 amp max.

Part number TP-SPLIT-2-16AWG-W

Single input to 2 x 2.1 x 5.5 x 13mm outputs
Total length 34cm. 16AWG. 8 amp max. input

Part number TP-SPLIT-4-WHITE

Single 2.1 x 5.5mm input to 4 x 2.1 x 5.5 x 13mm outputs
total length 72cm (splits at 37cm)
