

INTRODUCTION

RS485 serial ports are often used to enable communication between PC and RS485 devices.

This USB to RS485 serial cable with built-in a CH340 bus converter chip allows direct communication between PC and 485 device without extra wire connection. The converter works well with WindowsXP/Vista/7/8/10 system and has high stability and strong anti-interference. It provides instant connectivity to RS485 communication devices for industrial automation and instrumentation, as well as other devices like industrial sensors and home appliances with centralized control.

FEATURES

- Provides instant connectivity to RS485 communication devices
- High stability
- Strong anti-interference

APPLICATIONS

- Industrial sensors
- Home appliances

SPECIFICATION

- Chip: CH340
- Power Supply: 5V

- Length: 1m
- Interface Specification: red: VCC, black: GND, green: 485-A, white: 485-B
- Support System: Windows XP/Vista/7/8/10

SHIPPING LIST

- USB to RS485 Serial Cable x1
