

# Technical Information

## RIA45

Process indicator

Panel meter with control unit for monitoring and visualizing measured values

### Application

- Plant and apparatus engineering and construction
- Control rooms and cabinets
- Laboratories
- Process recording and supervision
- Process control
- Signal adjustment and signal conversion
- WHG compliant limit signal transmitter

- Min./max. value saved
- 1 or 2 calculated values
- One linearization table with 32 points for each calculated value
- 1 or 2 analog outputs
- Digital status output (open collector)
- Operation using 3 keys
- SIL2 approval (optional)

### Your benefits

- 5-digit, 7-segment backlit LC display
- User-configurable dot matrix display range for bar graph, units and tag name
- 1 or 2 universal inputs
- 2 relays (optional)

## Function and system design

### Application

1 Example for "differential pressure" application

The RIA45 panel meter powers the transmitter and processes analog signals from transmitters, particularly from the area of process instrumentation. These signals are monitored, evaluated, calculated, saved, separated, linked, converted and displayed. The signals, intermediate values and the results of calculations and analysis are transmitted by digital or analog means.

### Measuring system

The RIA45 is a process transmitter, which is controlled by a microcontroller, and exhibits a display, analog inputs for process and status signals, analog and digital outputs, as well as an interface for configuration.

Connected sensors (e.g. temperature, pressure) can be powered by the integrated transmitter power supply system. The signals to be measured are converted from analog to digital signals, processed digitally in the device, and then converted from digital to analog signals and made available to the various outputs. All measured values, and values calculated in any way, are available as a signal source for the display, all outputs, relays and the interface. It is possible to make multiple use of the signals and results (e.g. a signal source as an analog output signal and limit value for a relay).

### Mathematics functions

The following mathematics functions are available in RIA45:

- Sum
- Difference
- Multiplication
- Mean
- Linearization

#### Linearization function

Up to 32 user-definable points are available in the device per calculated value to linearize the input, e.g. for tank linearization. In the case of the two-channel device (option), mathematics channel M2 can be used to linearize mathematics channel M1.

Linearization is also available in the FieldCare configuration software.

<b>Switching output</b>	Open collector for monitoring the device state as well as open circuit and alarm notification. The OC output is closed in the fault-free operating state. In error state, the OC output is opened.

- $I_{\max} = 200 \text{ mA}$
- $U_{\max} = 28 \text{ V}$
- $U_{\text{on}/\max} = 2 \text{ V at } 200 \text{ mA}$

Galvanic isolation to all circuits, test voltage 500 V

## Relay output

Relay output for limit monitoring

Relay contact	Changeover
Maximum contact load DC	30 V / 3 A (permanent state, without destruction of the input)
Maximum contact load AC	250 V / 3 A (permanent state, without destruction of the input)
Minimum contact load	500 mW (12 V/10 mA)
Galv. isolation towards all other circuits	Test voltage 1500 V <sub>AC</sub>
Switching cycles	> 1 million

## Power supply

### Terminal assignment

A0010228

- 2 Terminal assignment of the process indicator (relay (terminals Rx1-Rx3) and channel 2 (terminals 21-28 and 025/026) optional). Note: Illustrated contact position of the relays if the power supply fails.

### Supply voltage

Wide range power supply 24 to 230 V AC/DC (-20 % / +10 %) 50/60 Hz

### Power consumption

Max. 21.5 VA / 6.9 W

**Interface connection data**

**Commubox FXA291 PC USB interface**

- Connection: 4-pin socket
- Transmission protocol: FieldCare
- Transmission rate: 38,400 baud

**Interface cable TXU10-AC PC USB interface**

- Connection: 4-pin socket
- Transmission protocol: FieldCare
- Order configuration: interface cable with FieldCare Device Setup DVD incl. all Comm DTMs and Device DTMs

Resolution	13 bit	
Temperature drift	≤ 0.01%/K (0.1%/18 °F) of measuring range	
Galvanic isolation	Testing voltage of 500 V towards all other circuits	

## Installation

**Mounting location** Panel, cutout 92 x 45 mm (3.62 x 1.77 in) (see 'Mechanical construction').  
Max. panel thickness 26 mm (1 in).

**Orientation** No restrictions.  
The orientation is determined by the readability of the display.  
Max. viewing angle range +/- 45° from the central display axis in every direction.

## Mechanical construction

### Design, dimensions

A0010208

3 Dimensions of the panel meter in mm (in)

1 Distance piece for terminals (Ex option)

**Weight** Approximately 300 g (10.6 oz)

**Material** Housing: plastic PC-GF10

### Terminals

Spring terminals	
Relay / auxiliary voltage terminals	0.2 to 2.5 mm <sup>2</sup> (24 to 12 AWG)
Input / output terminals	0.2 to 1.5 mm <sup>2</sup> (24 to 16 AWG)

**Panel thickness** Max. 26 mm (1 in)

## Operability

### Local operation

#### 4 Display of the panel meter

- 1 Channel display: 1: analog input 1; 2: analog input 2; 1M: calculated value 1; 2M: calculated value 2
- 2 Dot matrix display for TAG, bar graph and unit
- 3 Limit value indicators in the bar graph
- 4 "Operation locked" indicator
- 5 Green LED; measuring device operational
- 6 Red LED; error/alarm
- 7 Yellow LED; status of relay 1
- 8 Yellow LED; status of relay 2
- 9 Minimum/maximum value indicator

- Display
  - 5-digit, 7-segment backlit LC display
  - Dot matrix for text/bar graph
- Display range
  - 99999 to +99999 for measured values
- Signaling
  - Setup security locking (lock)
  - Measuring range overshoot/undershoot
  - 2 x status relay (only if relay option was selected)

#### Operating elements

3 keys: -, +, E

### Remote operation

#### Configuration

The device can be configured with the PC software or on site using the operating keys. FieldCare Device Setup is delivered together with the Commubox FXA291 or TXU10-AC (see 'Accessories') or can be downloaded free of charge from [www.endress.com](http://www.endress.com).

#### Interface

4-pin socket for the connection with a PC via Commubox FXA291 or TXU10-AC interface cable (see 'Accessories')

## Certificates and approvals

Current certificates and approvals that are available for the product can be selected via the Product Configurator at [www.endress.com](http://www.endress.com):

1. Select the product using the filters and search field.
2. Open the product page.
3. Select **Configuration**.

### Other standards and guidelines

- IEC 60529:  
Degrees of protection provided by enclosures (IP code)
- IEC 61010-1:  
Safety requirements for electrical equipment for measurement, control and laboratory use
- EN 60079-11:  
Explosive atmospheres - Part 11: Equipment protection by intrinsic safety "T" (optional)

## Ordering information

Detailed ordering information is available from your nearest sales organization [www.addresses.endress.com](http://www.addresses.endress.com) or in the Product Configurator at [www.endress.com](http://www.endress.com):

1. Select the product using the filters and search field.
2. Open the product page.
3. Select **Configuration**.

### Product Configurator - the tool for individual product configuration

- Up-to-the-minute configuration data
  - Depending on the device: Direct input of measuring point-specific information such as measuring range or operating language
  - Automatic verification of exclusion criteria
  - Automatic creation of the order code and its breakdown in PDF or Excel output format
  - Ability to order directly in the Endress+Hauser Online Shop

## Accessories

Various accessories are available for the device, and can be ordered with the device or at a later stage from Endress+Hauser. Detailed information on the specific order code is available from your local Endress+Hauser sales organization or on the product page of the Endress+Hauser website: [www.endress.com](http://www.endress.com).

### Device-specific accessories

#### Other

##### *Retrofitting of relays*

	Order No.
Relay card incl. terminals	RIA45X-RA

##### *Upgrade to two-channel device*

	Order No.
Multifunction input card for channel 2, incl. terminals, non-Ex	RIA45X-IA
Multifunction input card for channel 2, incl. terminals, Ex version	RIA45X-IB

**Communication-specific accessories**

Designation

Commubox TXU10 incl. FieldCare Device Setup and DTM Library
Commubox FXA291 incl. FieldCare Device Setup and DTM Library

## Supplementary documentation

The following types of documentation are available on the product pages and in the Download Area of the Endress+Hauser website ([www.endress.com/downloads](http://www.endress.com/downloads)) (depending on the selected device version):

Document	Purpose and content of the document
Technical Information (TI)	<b>Planning aid for your device</b> The document contains all the technical data on the device and provides an overview of the accessories and other products that can be ordered for the device.
Brief Operating Instructions (KA)	<b>Guide that takes you quickly to the 1st measured value</b> The Brief Operating Instructions contain all the essential information from incoming acceptance to initial commissioning.
Operating Instructions (BA)	<b>Your reference document</b> The Operating Instructions contain all the information that is required in various phases of the life cycle of the device: from product identification, incoming acceptance and storage, to mounting, connection, operation and commissioning through to troubleshooting, maintenance and disposal.
Description of Device Parameters (GP)	<b>Reference for your parameters</b> The document provides a detailed explanation of each individual parameter. The description is aimed at those who work with the device over the entire life cycle and perform specific configurations.
Safety Instructions (XA)	Depending on the approval, Safety Instructions (XA) are supplied with the device. The Safety Instructions are an integral part of the Operating Instructions.  Information on the Safety Instructions (XA) that are relevant for the device is provided on the nameplate.
Supplementary device-dependent documentation (SD/FY)	Always comply strictly with the instructions in the relevant supplementary documentation. The supplementary documentation is an integral part of the device documentation.
