The Rolson Coil lock is a very useful way to lock your valuable equipment-commonly used for bicycles but can also be used around the home and garden for items such as BBQs and garden machinery where you can loop the cable through frames to make the item secure. The keyed lock is supplied with 2 keys. The cable itself is made from separate braided strands of steel covered by a PVC sheath to ensure it withstands the rigours of our climate. It is 2m long ( nearly 7feet) and is flexible enough to be fed through most wheels and frames. The lock is easy to use straight out of the packet and will get you safe and secure within minutes.

SECURITY – supplied with 2 keys

CUT RESISTANT- Strong braided (twisted) metal strands resulting in a 12mm thick cable resistant to cutting

WEATHER RESISTANT CABLE – PVC Sheath provides protection for the cable from weather conditions, reducing the risk of tearing ripping and allowing the unit to stand up to the toughest environments

LENGTH – 1.8m ( 180cm ) long cable ideal for looping around cycle frames

WIDE APPLICATIONS – not only used on bikes but also great for garden equipment – motorbikes – BBQ

EASY TO STORE – Neatly reduces into a 20cm diameter for storage

BRAIDED CABLE – thicker cable means it is a safer option as its harder to cut
