# 10 Port USB C Fast Charger

# TIGER PART: TGR-10P-USB-C-PD

- 10 ports x 65 Watt max. Ultra Fast Power Delivery charging outputs
- 550W High Power Maximum load across all ports
- QC 4.0, SFCP, PD3.0, PE 2.0 Wide Compatibility
- Charge multiple devices optimally in fastest possible speed
- Supplied with everything you need in the box

### Six Safety Protection System

Front of unit shown above and rear of unit shown below

 $The Tiger Power range of industrial USB \ chargers \ are safety approved \ and \ highly \ reliable, \ meeting \ latest \ level \ VI \ energy \ efficiency \ legislation.$ The TGR-10P-USB-C-PD model has 10 ports USB type C ports each providing a 65W output featuring multi stage PD power delivery at 5V 3A / 9V 3A / 12V 3A / 15V 3A / 20V 3.25A. Allowing for an office or classroom to charge and sync their device at the same time this unit is manufactured in a metal case and is built to last for industrial and commercial applications as well as for high end domestic use

Specification -		ě		,	·										1PCS

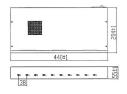

#### Attentions

- 1.USB hub is an electronic product, do not disassemble or repair it hyvourself.
- by yourself.

  2. Please avoid strong falls, collisions or use in high temperature, from temperature, humidity, dust and long-term exposure to sunlight to prevent internal wring is damaged.

  3. Correctly insert and remove the smart digital device to avoid damage to the USB port.

#### Instructions

- Insert the male end of the power cable into the female base of the charger and switch on the power.
   Ensure that the power switch is set to ON to charge.
   Remove the power cable from the charger and store it

### FAQ

Q: Is the product hot during charging? will it affect the use?
A: It is normal for USB devices to heat up during charging, the product metal shell itself is specific and strong heat dissipation, and the product it has done a high temperature aging test, so it is normal to encounter heat during use.

Q: I want to use the product in other countries, what if the power supply voltage is different?
A: This product uses 24V 23A built—in industrial power supply the factory default voltage is 220V voltage range. If you need to be in the United States, Talwar and other ITOV voltage environment use, piesse inform the sales staff in advance, otherwise the product cannot be used normally.
