

Peripheral Cable Anchor Lock, Secure Keyboard/Mouse, Cable Lock For Shared Office/Public Computers, Cable Trap Compatible w/Laptop Security Cable/Padlock - TAA

**Product ID:** CABLE-ORGANIZER-LOCK

The Peripheral Cable Anchor Lock is a versatile solution to deter the theft of keyboards, mice or other wired peripherals from a shared computer in offices or public spaces. Secure the cables to a single anchor point.

The cable collector metal plate ensures reliability and durability. Use in combination with a laptop security lock or padlock to prevent unauthorized opening of the buckle.

This anchor base plate is ideal for libraries, healthcare facilities, points of sale, retail stores, hot desk setups, classrooms, tradeshow, and other high-traffic areas. Combine the kit with additional accessories (sold separately) to secure other peripherals such as multiple devices (3M4-DESK-LOCKING-KIT), laptops or docking stations (UNIVK-LAPTOP-LOCK), video adapters (CONNLOCKPK10), tablets (KSLTAD), and additional K-slot devices (BRNCHLOCK).

Insert the peripheral cables into the cable traps and use a laptop security cable or padlock (sold separately) to prevent the collector buckle from being opened once it's secured. Use the included double-sided tape to keep the security anchor in place on the desk, this combined with the compact size of the cable lock makes for a tidy setup.

## Certifications, Reports and Compatibility

## Applications

## Features

- **DESK-MOUNTED CABLE ANCHOR LOCK:** Enable secure cable management of a mouse, keyboard, & other workstation peripherals; Ideal for shared office/public computers; Use cable trap w/laptop security cable or padlock to deter theft/unauthorized access
