

# Engineer Carry Bag DB1 / Engineer Pole Bag DP1

**Engineered protection meets smart storage—keep your pole and essential tools safe, organised, and ready to perform wherever the job takes you.**

The Engineer Pole Bag is purpose-built to protect your testing pole during transport and storage, while the durable Carry Bag is designed for Detectasmoke® and Detectahead® heat and CO detector testing equipment. With dedicated compartments for head units, battery batons, chargers, and aerosols, the Carry Bag provides a compact, organised solution for engineers and technicians on the move. Together, they offer complete, professional protection for every part of your testing kit.

See next page for Technical Specification.
