

DURATOOL

PCB HOLDER D03170

IMPORTANT SAFETY INFORMATION

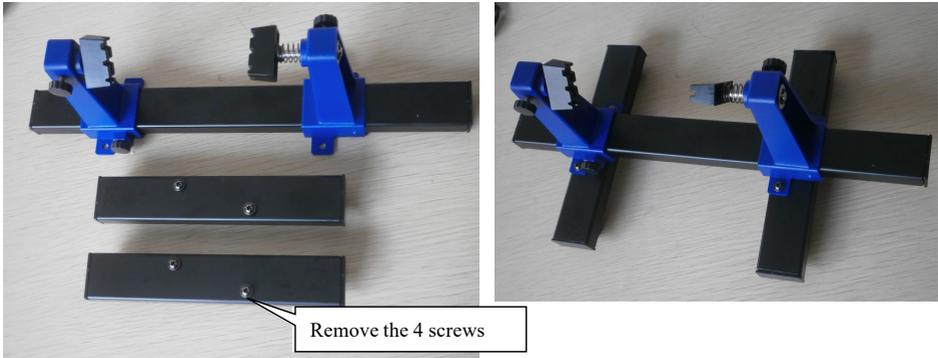

- Read these instructions carefully before installing and using this product. The manufacturer is not responsible for injuries or damages caused by incorrect installation and improper use of the item. Keep this manual in a safe place so that you can refer to it at any time during use of it.
- This appliance is not intended for use by persons (including children) who are not mentally able, physically capable, experienced or do not understand the product. They should be given supervision and instruction in the use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- Do not put any circuit board which exceeds the capacity of the stand to avoid damage to it.
- Keep the holder clean to avoid contamination of PCB and build up of flux and solder residue.

OVERVIEW

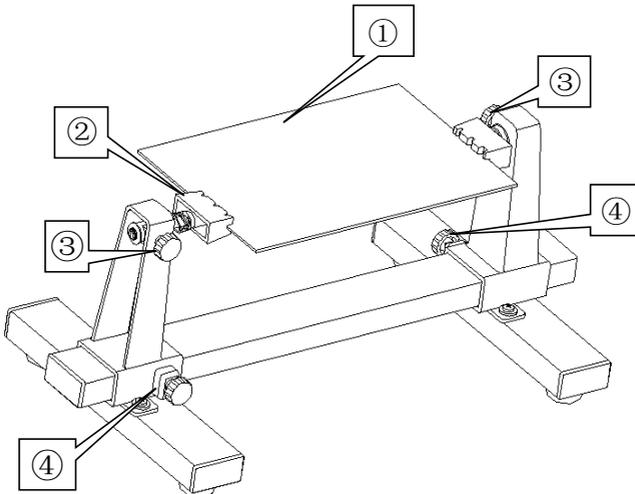

- Used for clamping all kinds of circuit boards, which is convenient for soldering, repairing and other operations.
- 360° adjustable holder. The holder can be adjusted through 360 degrees according to the user's requirement.
- Able to hold various circuit boards with different weights and heatproof to withstand high temperatures during work.
- Comes with silicone rubber feet, ensuring non-slip functionality and stability.

ASSEMBLY AND USE

- Remove the 4 screws from the feet sections.
- Locate the feet as shown below and secure using the 4 screws.

- Put the holder on an even surface.
- Based on the size and shape of the circuit board, move the upright sliders until the circuit board can be tightly fixed into the holder.
- Put the circuit board into the holder and adjust the slider then tighten the locking thumb screws

- ① Circuit board (not included)
- ② Clamp grips
- ③ Angle adjusting lock thumb screw
- ④ Length adjusting lock thumb screw
