ESW490-66 – IXYS Brand IXBOD1 Devices EOL & Pre-PCN Letter

To our valued customers,

Littelfuse would like to notify you that due to supply disruptions, we will issue EOL & Pre-PCN for the affected IXYS Brand IXBOD1 product family. For a detailed list of part numbers, please refer to the attached appendix.

We are actively working on the qualification of the new IXBOD2 series, which will serve as the replacement for the end-of-life IXBOD1 series. This transition involves a change in assembly and test location. Based on our current assessment, we estimate a qualification period of approximately 3 to 6 months will be required to ensure full compliance with our quality and reliability standards.

Littelfuse is also reviewing on hand WIP and material stock to fulfill as much as possible for existing backlog.

If you have any questions or concerns, please contact your local sales team or Talha Köktas, Power Bipolar Discrete, Product Marketing Engineer.

We value your business and look forward to assisting you whenever possible.

Thank you very much!

Form, fit, function changes: Major process change is from clip bond to wire bond. Die design, assembly site, BOM and equipment will change accordingly. Slight dimension difference but all in JEDEC spec.

Part number changes: Yes

Replacement products: IXBOD2

Last time buy: Dec 31st, 2025

Last time delivery: Mar 31st, 2026

Talha Köktas

Product Marketing Engineer
