TE Connectivity

Product Change Notification: P-26-030106

PCN Date: 10-APR-26

Customer: Avnet Europe BV (138376)

Location: Tongeren-Borgloon

Agreement: Agreement Unknown

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:

Heat-shrink molded parts with /97 Adhesive Precoat, S1297 Adhesive Tape, Heat-shrinkable Cable Entry Seals

Description of Changes

This notice informs you that due to an enforced change by a vendor to a raw material, TE Connectivity is reformulating the adhesive used in molded parts with /97 Adhesive Precoat, S1297 Adhesive Tape, and Heat-shrinkable Cable Entry Seals (CES).

Reason for Changes:

Product improvement. TE Connectivity (TE) makes the adhesive contained in the following products from a compound material designed internally that uses raw materials sourced from external vendors: /97 adhesive precoat on molded shapes, S1297 Adhesive Tape, and the adhesive precoat on CES products. One of the raw materials in the material has been discontinued and the adhesive will be reformulated. This reformulation will follow our defined change procedure to maintain safety, quality, compliance, and the same or improved form, fit, and function. There will be increased lead times on impacted products. TE is committed to resolving this as soon as possible. For assistance with alternative products, please contact our Product Management team. We understand this product reformulation and requalification may impact your operations, and we appreciate your understanding. We are committed to providing you with support during this time. Sincerely, The TE Connectivity Team
