Klippon® Relay

Product discontinuation note RIDERSERIES FG

RIDERSERIES FG successor – CUBESERIES FG

The products of our RIDERSERIES FG product family will be discontinued and replaced by our new CUBESERIES FG relays.

The CUBESERIES FG uses relays with positively driven contacts in accordance with EN 61810-3 Type B. This makes it ideal for signal monitoring in applications designed to protect people and machinery. The industrial relays from Europe deliver robustness, reliability and durability. The CUBESERIES FG relays modules with forced guided contacts optimize handling and storage thanks to their pre-assembled kits. Furthermore, they reduce wiring time with PUSH IN connection technology and the comprehensive cross-connectors.

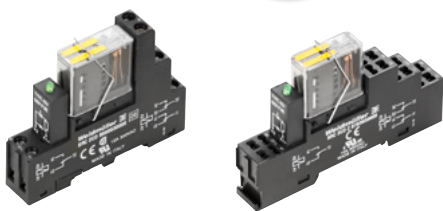

YOUR SPECIAL ADVANTAGES:

- KIT consisting of relay, socket, retaining clip and status indicator
- Fast wiring with PUSH IN
- 2 CO contacts according to EN 61810-3 Type B
- 100 % function-tested relay modules

Important note: The respective accessories of the RIDERSERIES FG relays are not compatible with the alternatively offered products. Therefore, the accessories must also be switched to the CUBESERIES FG. You can find the right accessories for the CUBESERIES FG relays in our online catalog at the respective relays.

The current plans do not assume this, but due to unforeseeable delivery bottlenecks in raw materials, the last order date for individual article numbers from this product discontinuation notification may have to be moved forward.

Discontinuation model

Type	Connection technology	Order No.
RCIKIT 24VDC 2CO LD/FG	Screw	1218410000
RCIKITZ 24VDC 2CO LD/FG	Tension clamp	1218390000

New version

Type	Connection technology	Order No.
CRIKIT S 24VDC 2CO L/D/MC FG	Screw	3162270000
CRIKIT P 24VDC 2CO L/D/MC FG	PUSH IN	3162280000
