DESCRIPTION OF CHANGE: To meet current customer demands, Würth Elektronik eiSos will implement auto-winding process, in addition to the manual winding, to wind the coil around the core, provided that the part continues to meet all the specifications stated in our datasheet. There will be no change in fit, function, quality or reliability of the product. The new revision of the affected part numbers will be sent out after the previous revision is out of stock (according to FIFO - first-in, first-out).	
DETAILS OF CHANGE: Due to auto-winding, the winding direction will be reversed. After the effective date, the parts will be produced in both the winding methods. The winding method used in the part can be distinguished from the Lot No.
