

Re: PCN Preliminary Notice

Good day,

This is a confirmation letter regarding the status of Dialight P/N's: 051-3101-01-303 and 103-3101-05-103

Dialight can no longer support current open orders of both finish good products and will not be fulfilled. Future orders will also not be supported.

These products are to be discontinued on PCN 141731. This PCN is expected to be released no later than June 30th, 2026

These products are being discontinued due to the end-of-life status of the terminals used to manufacture these products and low sales activity of the finish goods.

If additional information is required, such as the reason for discontinuation and identification of closest replacements, please contact Dialight Signals & Components.

Best regards,

Patrick Lay
