

Product Change Notification

Current Date: 30-Jun-2026

TE Connectivity

Product Change Notification: PCN-26-283716

PCN Date: 26-JUN-26

Customer: Avnet Europe BV (138376)

Location: Tongeren-Borgloon

Agreement: Agreement Unknown

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

Product Description: (Text limited to 120 characters)

RNF-100, VERSAFIT, CRN, TAT-125, RP-4800

General Description of Changes

Temporary Removal of Mil-Spec Approvals for Certain Heat Shrink Tubing Products

Other attachments:

[PCN wording file](#)

Reason for Changes:

One of the raw materials used in these product families is no longer produced at the supplier's original site due to a supplier-directed manufacturing location transfer. To maintain supply, TE Connectivity has qualified material from an alternate facility. Because of this change, Mil-Spec versions of the affected products are undergoing NAVAIR requalification and are temporarily unavailable for new Mil-Spec orders.

PCN Attributes:

Product Category:	Kind of Change:
Heat Shrink Tubing	Agency Approvals
Change Feature:	Potential Customer Impact:
No Feature Change	Agency Approval
Remarks:	
Mil-Spec hold due to supplier manufacturing location change

Subject: Product Change Notification - Temporary Removal of Mil-Spec Approvals for Certain Heat Shrink Tubing Products

PCN Number:

Date: June 26, 2026

Dear Customer,

We are writing to inform you of an important update regarding the Mil-Spec approvals of several TE Connectivity heat shrink tubing product families:

- **RNF-100** (Black and Colored Versions, Clear Versions are not affected)
 - *NOTE: only SP and STK RNF-100 versions with alpha color codes e.g., "BK" are impacted; RNF-100 with numeric color codes remain available but do not carry Mil-Spec*
- **Versafit** (Black and Colored Versions)
- **CRN** (Black Versions only)
- **TAT-125**
- **RP-4800**

One of the raw materials used in these product families is no longer manufactured at the supplier's original production facility due to a supplier-directed manufacturing location transfer. To ensure continuity of supply, TE Connectivity has qualified material produced at the supplier's alternate manufacturing facility.

Analytical and performance testing have confirmed that the material produced at the alternate facility meets all applicable specification requirements and demonstrates performance consistent with material previously supplied from the original facility. TE Connectivity has qualified the material produced at the alternate manufacturing facility and has confirmed that the change does not impact product quality, reliability, or performance.

As a result of the supplier manufacturing location change, the Mil-Spec versions of the affected products are undergoing requalification with NAVAIR and are temporarily unavailable for new Mil-Spec orders.

To support continued product availability during the requalification period, TE Connectivity has released corresponding non-Mil-Spec versions of the affected products. These products utilize the qualified material from the alternate manufacturing facility and meet TE Connectivity's internal specifications and applicable regulatory requirements. The only difference is that these products do not carry a Mil-Spec designation or label. A cross-reference table identifying the corresponding non-Mil-Spec part numbers is attached.

This temporary suspension of Mil-Spec approval applies only to products listed on the NAVAIR Qualified Products List (QPL), including standard product sizes and spool (-SP) and stick (-STK)

packaged configurations. Non-standard sizes and cut lengths are not Mil-Spec approved and are therefore unaffected by this notification.

Please note that any Mil-Spec product currently in customer or distributor inventory remains fully qualified, as it was manufactured and certified while the applicable QPL approval was active. Existing inventory may continue to be sold, shipped, and used without restriction.

TE Connectivity will provide an update once NAVAIR requalification activities have been completed and Mil-Spec approvals have been reinstated.

For additional information or assistance, please contact your local TE Connectivity account representative.

Please refer to the attached cross-reference table for impacted Mil-Spec part numbers and corresponding non-Mil-Spec alternatives.

Sincerely,
Megan Hannagen
Product Manager
TE Connectivity – Performance Materials

Frequently Asked Questions

Q1. Is there a last time buy window before this change takes effect?

The PCN does not mention a last time buy window. The change is already in effect — Mil-Spec versions are currently unavailable for new orders. Please contact your local TE Connectivity account representative for further guidance.

Q2. Will form, fit, or function be impacted by the material change?

No. TE Connectivity has confirmed through analytical and performance testing that the material produced at the alternate manufacturing facility meets all applicable specification requirements and demonstrates performance consistent with the previously supplied material.

Q3. What is the difference between the Mil-Spec and the non-Mil-Spec versions currently being offered?

The only difference is that the non-Mil-Spec versions do not carry a Mil-Spec designation or label. These products utilize the qualified material from the alternate manufacturing facility and meet TE Connectivity's internal specifications.

Q4. When will Mil-Spec approvals be reinstated?

Update will be provided once NAVAIR requalification activities have been completed and Mil-Spec approvals have been reinstated.

Q5. How does this change impact existing Mil-Spec inventory I am currently holding?

Any Mil-Spec product currently in distributor inventory remains **fully qualified**. Existing inventory may continue to be sold, shipped, and used without restriction

Q6. Will the part number change as a result of this PCN?

New non-Mil-Spec part numbers have been released as alternatives. A cross-reference table identifying the corresponding non-Mil-Spec part numbers is attached to the PCN.

Q7. How will this affect my existing open purchase orders?

This is not addressed in the current PCN. Please contact the TE Connectivity representative listed in this document for clarification.

Q8. Which product families and configurations are affected?

The following product families are impacted:

- **RNF-100** (Black and Colored Versions) — only SP and STK versions with alpha color codes (e.g., "BK", "RNF-100-1/2-BK-FSP"); numeric color code versions remain available but do not carry Mil-Spec (e.g., "0", RNF-100-1/2-0-SP)
- **Versafit** (Black and Colored Versions)
- **CRN** (Black Versions only)
- **TAT-125**
- **RP-4800**

Non-standard sizes and cut lengths are **not** Mil-Spec approved and are therefore **unaffected** by this notification.
