ATS22 End of Commercialization

This document officially announces the End of Commercialization (EoC) of the Altistart 22 (ATS22) soft starter range and defines the migration strategy toward the new Altivar Soft Starter ATS430 platform.

After more than 15 years on the market, ATS22 is facing increasing critical component obsolescence. In line with our portfolio renewal strategy, Drives Activity has introduced the ATS430 as the new commercial offer to ensure continuity, improved performance, and enhanced digital capabilities.

Please note that ATS430 is a migration product and not a direct 1:1 substitution. Mechanical footprint and commissioning parameters may differ.

General Timeline (Majority of References)

- **End of Commercialization:** June 30, 2026
- **End of Service Period:** May 31, 2035
- **Service Support Duration:** 8 years after discontinuation
