3.0 变更细节 Details

原先 From

Background

10-793748

Previously, products were packaged using tail boxes or bags without clearly defined standard packaging requirements. Generally, orders were shipped once stock became available, without formal notice to the customer regarding packaging specifications. This resulted in inconsistent packaging practices and a lack of clarity on standard pack quantities.

变更后 To

10-793748

Change Details: The packaging specification has been updated to PK-FG-552 Rev B, establishing clear standard pack quantities (SPQ) and carton configurations as follows:

SPQ: 500 pcs/bag, 500 pcs/box

Carton Quantity: 4,500 pcs/carton (9 boxes/carton)

Functional Impact: No impact on product performance. All electrical, mechanical, and environmental specifications remain unchanged. The change only affects packaging configuration.

Interchangeability: The product itself is unchanged. The new packaging specification is effective for all orders placed on or after Aug 1, 2026.

Existing inventory remains valid and can be shipped as-is.
