

Product Change Notification – 2026/09

Product Line:	etherCON Cable Connectors	Part No:	NE8MXR*
Piece Part:	Housing	Part No:	1038329
Engineering Change Request:	2026-1469	Date:	18 June 2026
Comments:	Change of CDC/KTL Coating Supplier		
Affected products:	NE8MXR-B-TOP NE8MXR-B-TOP-D NE8MXR1-B-TOP NE8MXR1-B-TOP-D		
First shipment of modified product:	T25		

Engineering Change Notice

As part of our commitment to maintaining high quality standards, we have identified and qualified a new supplier for our cathodic dip coating (CDC) products, also known as KTL. This change provides clear customer benefits. The new coating process provides improved abrasion resistance and enhanced durability of the coated components. Furthermore, the more matte surface finish reduces reflections and improves the visual appearance. There is no change to the chemical composition of the CDC/KTL coating, as both suppliers use the same coating formulation. Product article numbers remain unchanged. Full traceability is maintained through the production code.

*OLD
glossy finish*

*NEW
matte finish*
