Subj. Request for Deviation # 3598

September 2, 2026

To Whom it May Concern,

The purpose of this memo is to notify our distribution partners of a temporary deviation that will impact the solenoids listed below for builds completed between September 2, 2026, and December 18, 2026.

Impacted Part Numbers:

B14HD-254-B-4
B14HDP-254-B-4
B14HDP-258-B-4
B14HD-257-B-4
B14HDP-257-B-4
B14HDP-256-B-4
B14HD-253-B-4
B14HDP-253-B-4

Temporary Deviation:

Open frame solenoids listed about our provided with 10" wire leads, (1) white and (1) black. Due to a temporary shortage of material, orders of the above listed part numbers that ship between September 2, 2026, and December 18, 2026, will be supplied with (2) white wire.

Temporary Deviation Impact Assessment:

The temporary change from one black and one white lead wire to two white lead wires has no impact on the performance, function, or reliability of the LEDEX open frame solenoid. The lead wires connect directly to the solenoid coil, which is not polarity sensitive. As a result, wire color serves only as a visual identification aid and does not affect the electrical or mechanical operation of the device. Therefore, this deviation is considered cosmetic in nature and does not affect form, fit, or function.

Please contact me with any questions or concerns.

Regards,

Rocky Scalise
